Remove individual to fresh air.

###### *Skin contact:*

First aid is not normally required, however, it is good practice for exposed areas to be washed with soap and water.

###### *Eye contact:*

Flush with plenty of water for 15 minutes or use eyewash lotion. Seek medical attention.

##### 4.2 Most important symptoms and effects, both acute and delayed:

Acute and delayed effects are indicated in sections 2 and 11.

##### 4.3 Indication of any immediate medical attention and special treatment needed:

Non-applicable.

#### 5. FIRE-FIGHTING MEASURES

##### 5.1 Extinguishing media:

Not flammable.

Suitable extinguishing media: Foam, CO<sub>2</sub>, powder extinguisher.

Extinguishing media not suitable: Do not use water jets.

##### 5.2 Special hazard arising from the substance or mixture:

As a result of combustion or thermal decomposition reactive sub-products are created that can become highly toxic and can present a serious health risk.

##### 5.3 Advice for firefighters:

Depending on the magnitude of the fire it may be necessary to use full protective clothing and individual respiratory equipment. Minimum emergency facilities and equipment should be available (fire blankets, portable first aid kit, ...) in accordance with Directive 89/654/EC.

Act in accordance with the Internal Emergency Plan and the Information Sheets on actions to take after an accident or other emergencies. Destroy any source of ignition. In case of fire, refrigerate the storage containers and tanks for products susceptible to inflammation. Avoid spillage of the products used to extinguish the fire into an aqueous medium.

#### 6. ACCIDENTAL RELEASE MEASURES

##### 6.1 Personal precautions:

Isolate leaks if there is no additional risk for the people performing this task. Personal protective equipment must be used against potential contact with the split product. Evacuate the area and

keep out uninvolved personnel. Destroy all sources of ignition. Eliminate electrostatic charges.

### **6.2 Environmental precautions:**

Keep the product away from drains and waterways. In the case of serious spillage into an aqueous medium notify the relevant authority.

### **6.3 Methods for cleaning up:**

Stop leak if without risk. Collect spillage with non-combustible absorbent material (e. g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local/national regulations. The spilled material must be neutralized.

## **7. HANDLING AND STORAGE**

### **7.1 Precautions for safe handling:**

Comply with the current legislation concerning prevention of the industrial risks. Keep containers hermetically sealed. Control spills and residues. Maintain order and cleanliness where dangerous goods are used. Use appropriate protective equipment.

Do not eat, drink or smoke during the production process. Wash hands afterwards.

### **7.2 Conditions for safe storage:**

Store in original container protected from direct sunlight in a dry, cool and well-ventilated area. Avoid sources of heat and open flames, contact with food, static electricity. Protect from precipitation.

Containers that have been opened must be carefully released and kept upright to prevent leakage. Do not store in unlabeled containers.

## **8. EXPOSURE CONTROLS/PERSONAL PROTECTION**

### **8.1 Control parameters:**

Components with limit values that require monitoring at the workplace:

Isopropyl alcohol: TLV: 200 ppm as TWA; 400 ppm as STEL; A4 (not classifiable as a human carcinogen); (ACGIH 2004).

Glycerin: TWA 10 mg/m<sup>3</sup>; MAK (inhalable fraction): 50 mg/m<sup>3</sup>; Peak limitation category: I (2); Pregnancy risk group: C; (DFG 2006).

### **8.2 Exposure controls:**

#### *General hygiene:*

As a preventative measure it is recommended to use basic Personal Protection Equipment in accordance with Directive 89/686/EC.

#### *Respiratory protection:*

The use of the protection equipment will be necessary if a mist form or if the professional exposure limits are exceeded.

#### *Specific protection for the hands:*

Handle with rubber gloves. Gloves must be inspected prior use.

#### *Ocular and facial protection:*

The use of safety glasses will be necessary if a mist form.

*Other protective equipment:*

Full body protection is recommended if mist form.
