FITTING INSTRUCTIONS

- Begin by removing the passenger seat using the key, as shown in picture 1.
- Slide the wiring distribution box out of its holder as shown in picture 2, then disconnect all three connectors, noting the application of each.
- Remove the 8x black Phillips head screws on the underside of the undertray and carefully remove the cover panel.
- Remove the 2x nuts on the rear of the brake light, as shown in Picture 3, and disconnect the brake light connector. Carefully slide the brake light unit out of the back of the bike.
- Remove the 4x hex bolts securing the original tail bracket from the underside, using an 8mm socket, then gently lower and remove the bracket, as shown in picture 4.
- Remove the 2x rubber grommets from the brake light bracket that held the brake light in the locations circled in picture 5 and re-install them in the supplied brake light bracket **(Item 2)**.
- Fit the brake light bracket **(Item 2)** to the main bracket **(Item 1)** using the 2x M5 bolts & 2x M5 nyloc nuts **(Items 6 & 7)** in the orientation shown in the first assembly diagram.
- Loosen the indicator securing bolts using an 8mm spanner, as shown in picture 6.
- Slide the indicator clamping plate away as shown in picture 7, followed by the main body of the indicator and wiring, as shown in picture 8.
- Remove the rubber indicator mounting blocks shown in picture 9, by sharply forcing the protruding end down and pulling away from the tail bracket.
- Fit the mounting blocks to the R&G tail bracket **(Item 1)** as shown in picture 10 and re-assemble the indicator assemblies as original. Slide an indicator spacer **(Item 11)** between the rubber block and inner face of the tail bracket as shown in picture 10. You may need to snip an edge of the spacers to be able to fit them around the blocks.
- Secure the license plate light **(Item 3)** to the bracket using a 6mm spanner as shown in picture 12. Then fit the remaining wiring connector to the license plate light bullet connectors (shown in picture 11) & cover with the heatshrink, then thread the 3x wires through the small hole in the centre of the main bracket & brake light bracket.
- The wires can be secured to the main bracket **(Item 1)** with the cable ties, passing them through the 6x small elongated holes.
- Offer the tail bracket assembly up to the original mountings as shown in picture 15, with the 4 bracket spacers sitting within the mounting bores, and all wiring fed through the cut-out.
- Secure the tail bracket to the bike with the 4x M6 bolts **(Item 4)** and washers **(Item 5)** as shown in picture 14. Then feed the brake light through the original cut out and seat the two lugs (shown in picture 5) through the 2x OE rubber grommets on the brake light bracket (shown in picture 13) and secure using the OE washers & nuts.
- Correctly reconnect all wiring, then slide it back onto its holder. Refit passenger seat.
- Test operation of all lights.

- Mount the licence plate (it may require drilling) to the bracket in a central position.
- Depending on local laws, attach enclosed reflector (**Item 12**) in an appropriate location.
- **IMPORTANT: IF FITTING A FULL-SIZE LICENCE PLATE AND PLACING IT FAR DOWN ON THE LICENCE PLATE HANGER, THERE IS A SMALL CHANCE OF THE LICENCE PLATE HITTING THE BACK WHEEL UNDER HEAVY LOAD AND OVER LARGE BUMPS IN THE ROAD. IT IS YOUR RESPONSIBILITY TO CHECK FOR THIS POSSIBILITY AND TAKE AVOIDING ACTION. FAILURE TO CHECK THIS COULD RESULT IN SERIOUS INJURY.**

CONSUMER NOTICE

The catalogue description and any exhibition of samples are only broad indications of the Products and R&G may make design changes which do not diminish their performance or visual appeal and supplying them in such state shall conform to the order. The Buyer acknowledges no representation or warranty (other than as to title) has been given or will apply to the Products other than those in R&G's order or confirmation and the Buyer confirms it has chosen the Products as being of merchantable quality and suitable for its particular purposes. Where R&G fits the Products or undertakes other services it shall exercise reasonable skill and care and rectify any fault free of charge unless the workmanship has been disturbed. The Buyer is responsible for ensuring that the warranty on the motorcycle is not affected by the fitting of the Products. On return of any defective Products R&G shall at its option either supply a replacement or refund the purchase money but shall not be liable if the Products have been modified or used or maintained otherwise than in accordance with R&G's or manufacturer's instructions and good engineering practice or if the defect arises from accident or neglect. Other than identified above and subject to R&G not limiting its liability for causing death and personal injury, it shall not be liable for indirect or consequential loss and otherwise its liability shall be limited to the amounts paid by the Buyer for the Products or the fitting or service concerned. These terms do not affect the Buyer's statutory rights.

R&G RACING RETURNS POLICY (NON-FAULTY GOODS)

Returns must be pre-authorized (if not pre-authorized the return will be rejected). Goods may only be returned direct to us if they were purchased direct from us (customer must prove if necessary). Otherwise to be returned to original vendor. Goods must be in re-sellable condition, in the opinion of R&G Racing. All returns are subject to a 25% restocking and handling fee (25% of the gross value exc. P&P - at the prevailing price at time of purchase). The customer must pay any and all carriage charges. No returns of discontinued products, unless within 14 days of purchase. This policy does not affect your statutory rights and does not refer to faulty goods.

NOTICE DE MONTAGE

- Commencez par retirer la selle passager à l'aide de la clé, comme indiqué sur la photo 1.
- Faites glisser le boîtier de distribution de câblage hors de son support comme indiqué sur la photo 2, puis débranchez les trois connecteurs en notant l'application de chacun.
- Retirez les 8x vis à tête cruciforme noires sur la face inférieure de la protection inférieure et retirez délicatement le panneau.
- Retirez les 2x écrous à l'arrière du feu stop, comme indiqué sur la photo 3, et débranchez le connecteur du feu stop. Faites glisser avec précaution l'unité de feu stop hors de l'arrière de la moto.
- Retirez les 4 boulons hexagonaux fixant le support de queue d'origine par le dessous, à l'aide d'une douille de 8 mm, puis abaissez doucement et retirez le support, comme indiqué sur la photo 4.
- Retirez les 2x œillets en caoutchouc du support de feu stop qui maintenaient le feu stop aux emplacements encerclés sur la photo 5 et réinstallez-les dans le support de feu stop fourni (article 2).
- Montez le support de feu stop (article 2) sur le support principal (article 1) à l'aide des 2 boulons M5 et des 2 écrous nyloc M5 (articles 6 et 7) dans le sens indiqué sur le premier schéma de montage.
- Desserrez les boulons de fixation de clignotant à l'aide d'une clé de 8 mm, comme indiqué sur la photo 6.
- Faites glisser la plaque de serrage de clignotant comme indiqué sur la photo 7, puis le corps principal de clignotant et le câblage, comme indiqué sur la photo 8.
- Retirez les blocs de montage des clignotants en caoutchouc illustrés sur la photo 9, en forçant brusquement l'extrémité saillante vers le bas et en les éloignant du support.
- Montez les blocs de montage sur le support R&G (article 1) comme indiqué sur la photo 10 et réassemblez les ensembles de clignotants comme d'origine. Glissez une entretoise de clignotant (article 11) entre le bloc de caoutchouc et la face intérieure du support comme indiqué sur la photo 10. Vous devrez peut-être couper un bord des entretoises pour pouvoir les ajuster autour des blocs.
- Fixez le feu de plaque d'immatriculation (article 3) au support à l'aide d'une clé de 6mm comme indiqué sur la photo 12. Ensuite, installez le connecteur de câblage restant sur les connecteurs de feu de plaque d'immatriculation (illustrés sur la photo 11) et couvrez avec la gaine thermo rétractable, puis enfitez les 3 fils à travers le petit trou au centre du support principal et du support de feu stop.
- Les fils peuvent être fixés au support principal (Article 1) avec les serre-câbles, en les faisant passer à travers les 6x petits trous oblongs.
- Présentez l'ensemble du support sur les fixations d'origine comme indiqué sur la photo 15, avec les 4 entretoises de support situées dans les alésages de montage et tout le câblage passant par la découpe.

Tel: +44 (0)1420 89007 Fax: +44 (0)1420 87301 www.rg-racing.com Email: info@rg-racing.com

- Fixez le support à la moto avec les 4 boulons M6 (article 4) et les rondelles (article 5) comme indiqué sur la photo 14. Faites ensuite passer le feu stop à travers la découpe d'origine et placez les deux pattes (illustrées sur la photo 5) à travers les 2 œillets en caoutchouc d'origine sur le support de feu stop (illustré sur la photo 13) et fixez à l'aide des rondelles et des écrous d'origine.
- Rebranchez correctement tout le câblage, puis faites-le glisser sur son support. Remonter la selle passager.
- Testez le fonctionnement de tous les feux.
- Montez la plaque d'immatriculation (cela peut nécessiter un perçage) sur le support en position centrale.
- En fonction des lois locales, fixez le réflecteur fourni (article 12) à un emplacement approprié.
- **IMPORTANT : SI VOUS MONTEZ UNE PLAQUE D'IMMATRICULATION DE GRANDE TAILLE ET LA PLACEZ BIEN EN BAS SUR LE SUPPORT DE PLAQUE D'IMMATRICULATION, IL Y A UN RISQUE QUE LA PLAQUE D'IMMATRICULATION FRAPPE LA ROUE ARRIÈRE SOUS UNE CHARGE LOURDE ET SUR DE GROSSES BOSSES SUR LA ROUTE. IL EST DE VOTRE RESPONSABILITÉ DE VÉRIFIER CETTE POSSIBILITÉ ET DE PRENDRE DES MESURES POUR ÉVITER. NE PAS VÉRIFIER CELA POURRAIT ENTRAÎNER DES BLESSURES GRAVES.**
