Note!

Please note that this image is a general representation of the product and may differ slightly from your product.

Note!

Please note that during storage and transportation, especially at high ambient temperature, some of the oil and grease used for assembling may leak and stain the packaging. This is in no way detrimental to the product, wipe off the excessive oil/grease with a cloth.

Warning!

Before installing this product, read the Öhlins Owner's Manual. The shock absorber is an important part of your vehicle and will affect the stability.

Shock Absorber for Ducati Monster 795/796

DU 432

Mounting Instructions

MOUNTING INSTRUCTIONS

Warning!

It is advisable to have an Öhlins dealer install the shock absorber.

Warning!

If working on a raised vehicle, ensure it is securely supported so that it will not tip over.

1

Put the motorcycle on a work stand so that the rear wheel barely touches the ground. Make sure the motorcycle is in a stable position.

2

Remove the seat by unlocking it with the ignition key.

3

Remove the rear hanger by loosening the two screws to access the lower shock absorber bolt.

4

Remove the standard shock by loosening the upper bracket nut (1) and the lower shock absorber bolt (2).

5

Loosen the two screws (3)(4) under the subframe and install the reservoir bracket as per picture 2 using the screws and the washer included in the kit.

6

Remove the upper bracket from the standard shock absorber and install it onto the Öhlins shock absorber.

7

Install the Öhlins shock absorber on the motorcycle.

Note!

Before mounting this product clean the vehicle thoroughly.

Note!

When working on this product, always see the Vehicle Service Manual for vehicle specific procedures and important data.

8

Install the reservoir into the bracket and reverse all procedures.

Note!

Lower the vehicle so that the suspension is slightly compressed before tightening the screws.

Caution!

Ensure that all screws are tightened to the correct torque and that nothing fouls or restricts movement
