6. PBS INFORMATION

Breast milk is best for babies. Professional advice should be followed before using an infant formula. Introducing partial bottle-feeding could negatively affect breast feeding. Good maternal nutrition is important for breast-feeding and reversing a decision not to breast-feed may be difficult. Infant formula should be used as directed. Proper use of infant formula is important to the health of the infant. Social and financial implications should be considered when selecting a method of feeding.

EleCare® PBS INFORMATION: Authority Required. Initial and continuing treatment for cows' milk protein enteropathy in patients up to 24 months of age. Initial and continuing treatment for combined intolerance to cows' milk protein, soy protein and protein hydrolysate formulae, the patient must be older than 24 months of age. Initial and continuing treatment for proven combined immunoglobulin E (IgE) mediated allergy to cows' milk protein and soy protein, the patient must be up to the age of 24 months. Initial and continuing treatment for severe cows' milk protein enteropathy with failure to thrive, the patient must be up to the age of 24 months.

EleCare® LCP; Initial treatment: 9339M;
Continuing treatment: 9340N.

EleCare® Unflavoured and EleCare® Vanilla;

[^] Breast milk is best for babies. Professional advice should be followed before using an infant formula. Introducing partial bottle-feeding could negatively affect breast-feeding. Good maternal nutrition is important for breast feeding and reversing a decision not to breast fed may be difficult. Infant formula should be used as directed. Proper use of infant formula is important to the health of the infant. Social and financial implications should be considered when selecting a method of feeding. ANZ.2020.10616.AND -PND.3 (v3.1)
