

Epaderm[®]

An emollient for dry skin conditions

Developed by dermatologists, Epaderm Ointment is a 3 in 1 emollient, skin cleanser and bath additive that provides relief for dry skin conditions. Epaderm Ointment does not contain any fragrances, colourings or additives. It can be used on all dry skin conditions and is suitable for all ages including babies. Guidelines published by NICE¹ state that greasy emollients like Epaderm Ointment are more effective than non greasy alternatives.

Epaderm Ointment is ideal for use in the wet or dry wrapping technique with Tubifast[™] Garments.

SLS Free

3 in 1 emollient, bath additive and skin cleanser SLS free

- No colourings, fragrances, additives or preservatives
- Low sensitisation - suitable for all ages, including babies
- Developed by dermatologists

How Epaderm Ointment works

Epaderm Ointment is an emollient developed by dermatologists specifically for sufferers of dry skin conditions.

Epaderm Ointment offers the three aspects of complete emollient therapy in one,² as it can be used on the skin, as a bath additive or as a skin cleanser.

Epaderm Ointment creates a barrier which aids moisture retention within the skin. It is highly versatile.

Alternative Epaderm Ointment uses

Using Epaderm as a skin cleanser

When caring for dry skin conditions, it is vital to ensure that moisturisation is carried out wherever possible. However, it is equally important that no soaps or products containing detergents are used as they will increase water loss from the skin.³ Using Epaderm as a skin cleanser ensures that dry skin can be properly washed, without losing additional moisture or having to deal with the problems that common soap additives might produce. Scoop a small amount from the tub, lather under warm water and then use as a normal soap.

Using Epaderm Ointment in the bath

Soaking the skin in an emollient, for optimum rehydration, is another key step of complete emollient therapy.²

As Epaderm Ointment contains no fragrances, colourings or additives, baths can be taken as often as required. Take 4g from the tub. Melt this in a tumbler of hot water, ensuring it has cooled sufficiently before adding to the bath. Do not apply hot water directly to the skin. When using Epaderm Ointment as a bath additive, care should be taken, as it will make the surface of the bath slippery.

Benefits of Epaderm Ointment

- Epaderm Ointment's formulation contains no fragrances, colourings or additives
- Epaderm Ointment's barrier aids moisture retention within the skin
- Epaderm Ointment can be used on the skin, as a bath additive or skin cleanser and offers complete emollient therapy in one product
