

ACTTnow Bespoke Manual Handling Awareness

A Bespoke Course for you Organisation

We will work closely with you to create a bespoke course that specifically meets the individual needs of your organisation and your employees. The course will cover all the standard course elements whilst including your specific requirements.

Course Overview

A course for all employees who undertake manual handling operations as part of their work tasks. By the end of the course, participants will have a basic knowledge of human anatomy, appreciate manual handling legislation and risk assessment, understand the principles of safe manual handling and be able to apply these principles to their own work situations.

This course will comprise of instruction via both theory and practical sessions. There will be a proportion of instructor led group participation and practical exercises in lifting techniques.
