Airbus C295 Long Term Removable Mount (LTRM™) Installation and Removal Manual

Document no. PM-C295-CA/FO Installation and Removal Manual	Revision 20-01	Date 08 June 2020	Page 2 of 5
---	-------------------	----------------------	----------------

Read Before Use

Follow the instructions to ensure proper installation, deployment and maintenance of the PIVOT PM-C295-CA and PM-C295-FO LTRM™ device.

For the purposes of this manual, the term “LTRM™ device” will be replaced with “device” as appropriate, as these terms are interchangeable.

Purpose

Provide information for correct installation, removal, and maintenance of the device for the Airbus C295.

Extent

This instruction manual is appropriate for all personnel involved in the installation, removal, or maintenance of the device for the Airbus C295.

Reference / Definitions

LTRM	Long Term Removable Mount
Device	LTRM™ device
CA	Captain’s Side Mount (PM-C295-CA)
FO	First Officer’s Side Mount (PM-C295-FO)

Overview

The PIVOT LTRM™ device consists of several parts:

- Contoured attachment plate
- Universal mounting plate

To ensure proper fit and function, the clip provided by Airbus must remain installed.

Total installation time for a shipset (CA and FO) is approximately five (5) minutes. Captain and First Officer devices are mirrored and have the same installation and removal process. Installation does not require tools. Accomplishing the steps detailed in the manual provide any user with required data for successful installation or removal. You may also want to refer to the following link: <https://pivotcase.com/ltrm/>.

Installation Instructions

Hold the device in both hands and place over the clip as shown.

Guide the device into position using both hands.

Apply pressure to the edge of the device closest to you and ensure it clicks into place.

The installation is complete.

Attachment & Removal of PIVOT Case to LTRM

Refer to PIVOT Case User User Guide for details.

Removal Instructions

With both hands, grip the bottom edge of the device.

While pulling the edge, gently lift the device upwards.

Continue lifting the device upwards with both ends, while maintaining clearance from the clip.

The removal is complete.

Daily Use Considerations

Scratches and other surface imperfections are typical and do not affect the performance of the device.

If a discrepancy is identified, remove the device from service and either repair or replace. If any part is visibly damaged, loose, or missing, remove the device from service and either repair or replace before further use. All surfaces of the device may be wiped with a solvent-free cleaner to remove any accumulated dirt or debris prior to being re-installed.
