#deskgoals

Dress My Desk was conceived to inspire people in their workplace and achieve their desk goals. It started in 2018 as a blog on office organization, productivity and desk styling. It quickly evolved into an independent brand of designer looking stationery and office decor at affordable pricing.

We have our own collection of desk essentials designed exclusively by the founder, Miss Greene. We feature this exclusive collection in our pop-up shops and in our online shop.

#marketday

We participated in different vendor shows for makers and independent brands all over Florida. Our booth is always a delight to both shoppers and fellow vendors as we bring variety to the event. We are always the only brand offering unique office and school supplies that are affordable and functional. We continuously improve our booth setup and we never fail to amaze every single person that would visit our booth.
