

Paracord Key Chain Instructions

1) get everything you need
Paracord, Key ring, Carabiner, Ruler, Scissors
and a flame

2) Grab the keyring and place the
looped end of the paracord through the
keyring. Once through place the two
ends through the loop and pull tight

3) Place the loose ends through the
carabiner and then use a ruler to work
out the length of your key chain

4) Set up as per the 1st picture here

5) Start the Knot: Hold two center cords and two end cords. Take the left end cord and cross it over the center cords, creating a loop on the left side.

6) Cross and Loop: Take the right end cord, place it over the tail of the left cord, then tuck it under the center cords and through the loop made by the left cord. Pull both end cords to tighten.

7) Alternate Sides: Repeat the same process but start with the right end cord this time. Keep alternating sides for each new knot.

8) Continue until you have knotted up to the keyring

9) Pull the two end cords tight

10) Cut off with scissors leaving half a cms exposed

11) Use the flame to melt the ends and then using a damp finger push the end in
