Protect a wide variety of powered electronics per room, from door lock routers and gateways, WiFi modems, fiber connections and more. We built the Wall Electronics Box (WEB) to keep powered electronics safe and secure and out of reach of hotel guests or housekeeping personnel.

The Patent Pending design was developed to withstand an active construction zone, busy room use by guests, to damaging effects that can occur from moving furniture during daily housekeeping and beyond. Our UL Listed, Flame Resistant ABS Plastic does not interfere with Wi-Fi signals.

Integrating the RPT-H or RPT-V provides up to four tamper resistant, accessible, always-on receptacles for general use.
