

RICHARD CLARKSON STUDIO

PROJECT PORTFOLIO

WE ARE RCS

ABOUT US:

Richard Clarkson Studio (RCS) is an art & design laboratory specializing in lighting, installation and product. Located in Brooklyn NY USA and operating for over 5 years we are a lean but highly capable team with backgrounds in art, design, & science.

CUSTOM PROJECTS:

The following projects are a collection of some of our favorite projects and custom designs. From massive collaborative installations to intricate custom finishing we will find a way to bring your project, idea or design to life.

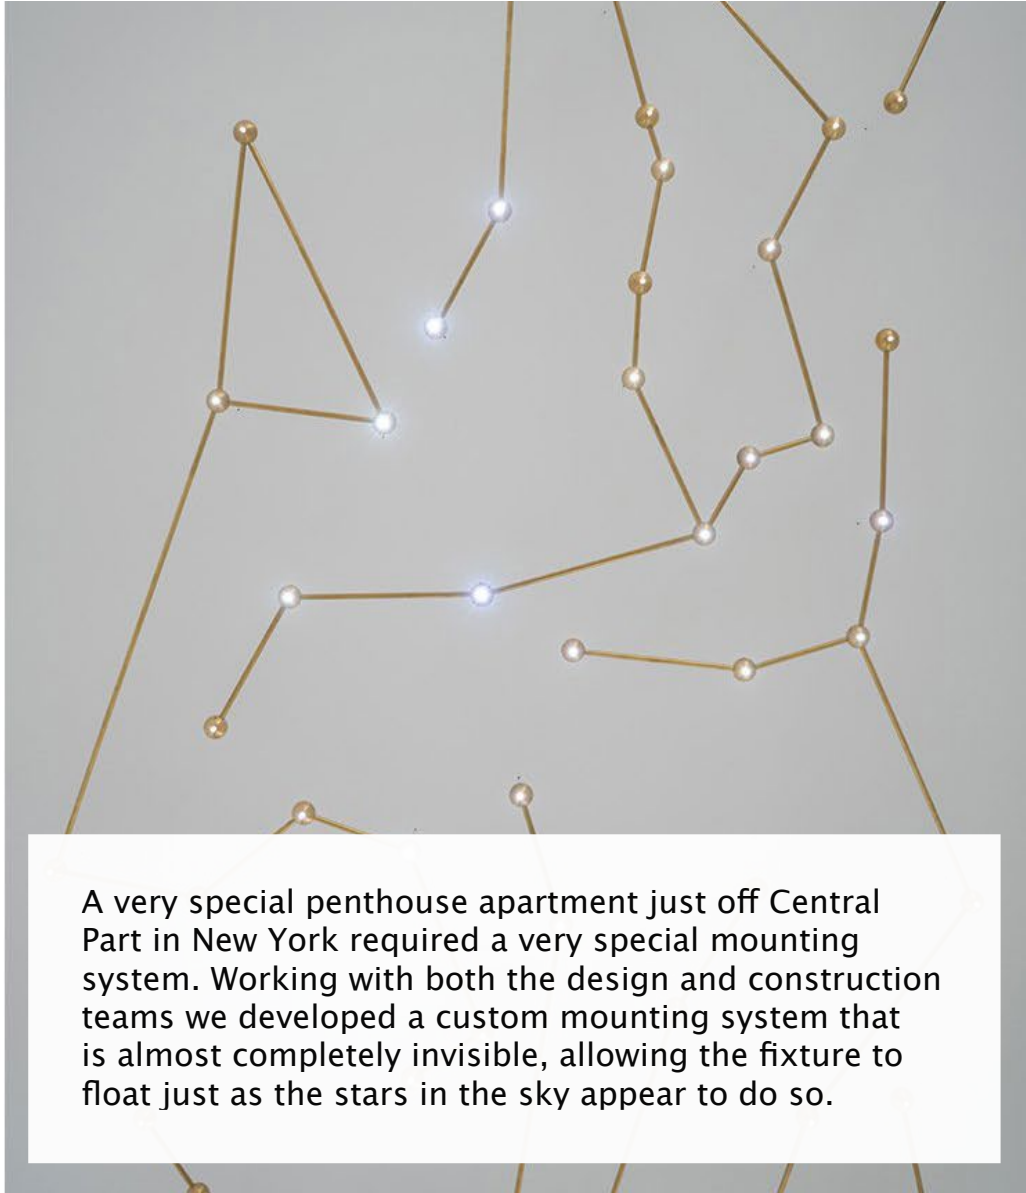

AD SHOW CLOUD

We wanted to do something special as part of our booth for the 2019 Architectural Digest Design Show – and what better way to do that than with a 5ft Cloud!

CUSTOM CONSTELLATIONS FOR PENTHOUSE APARTMENT

A very special penthouse apartment just off Central Part in New York required a very special mounting system. Working with both the design and construction teams we developed a custom mounting system that is almost completely invisible, allowing the fixture to float just as the stars in the sky appear to do so.

SALESFORCE CLOUDS

A huge installation at Dreamforce 2019. Some of our custom-made 7ft clouds merged the 2D & 3D in this entranceway experience.

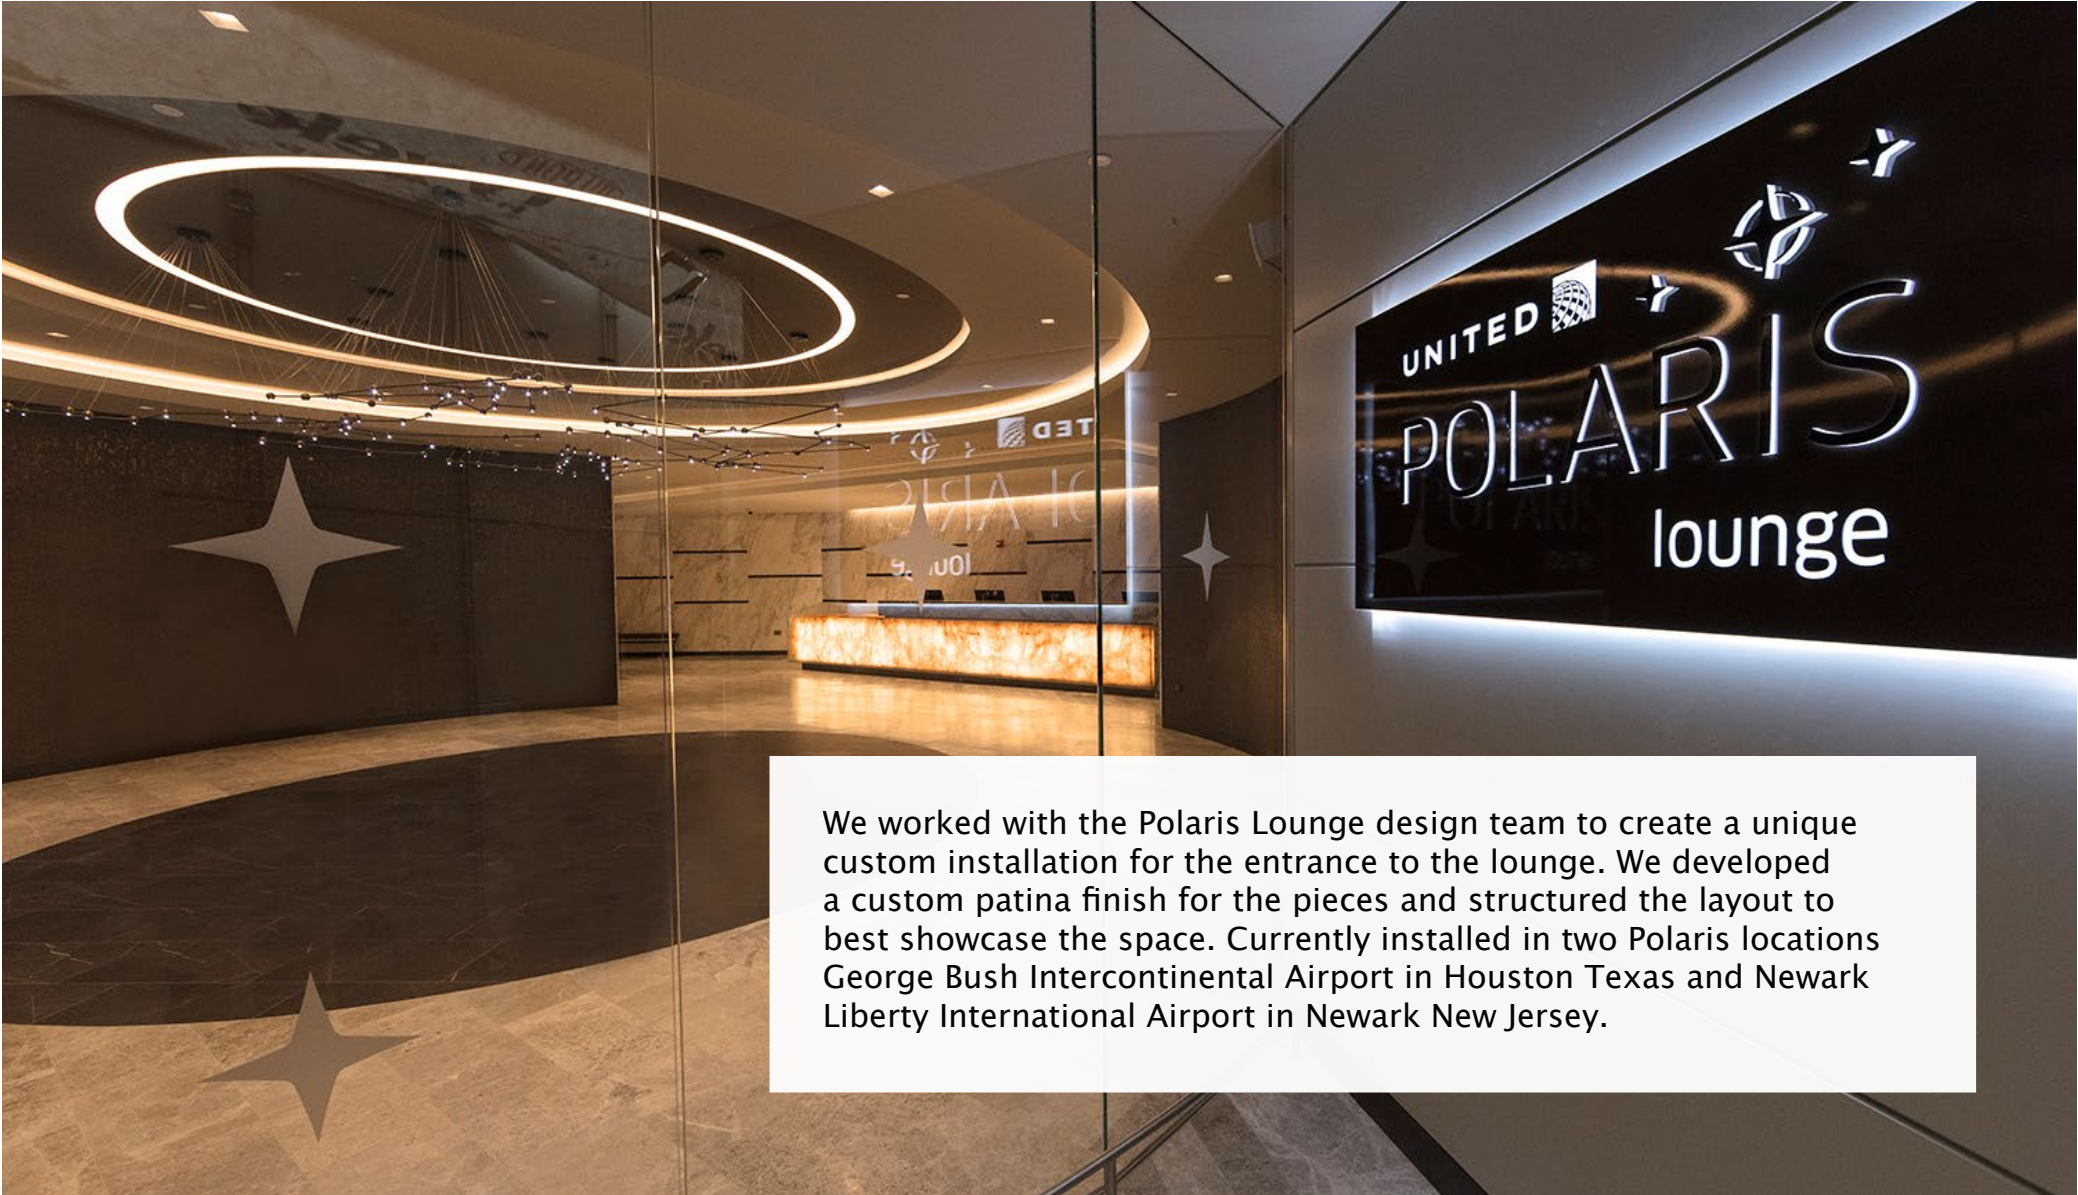

CLOUDS FOR ICFF

Trade shows can get overwhelming very quickly – especially ones as large as New York International Contemporary Furniture Fair. We teamed up with Factice Studio to create a rest area for guests to relax & re-energize.

CONSTELLATION INSTALLATION FOR UNITED AIRLINES LOUNGE

We worked with the Polaris Lounge design team to create a unique custom installation for the entrance to the lounge. We developed a custom patina finish for the pieces and structured the layout to best showcase the space. Currently installed in two Polaris locations George Bush Intercontinental Airport in Houston Texas and Newark Liberty International Airport in Newark New Jersey.

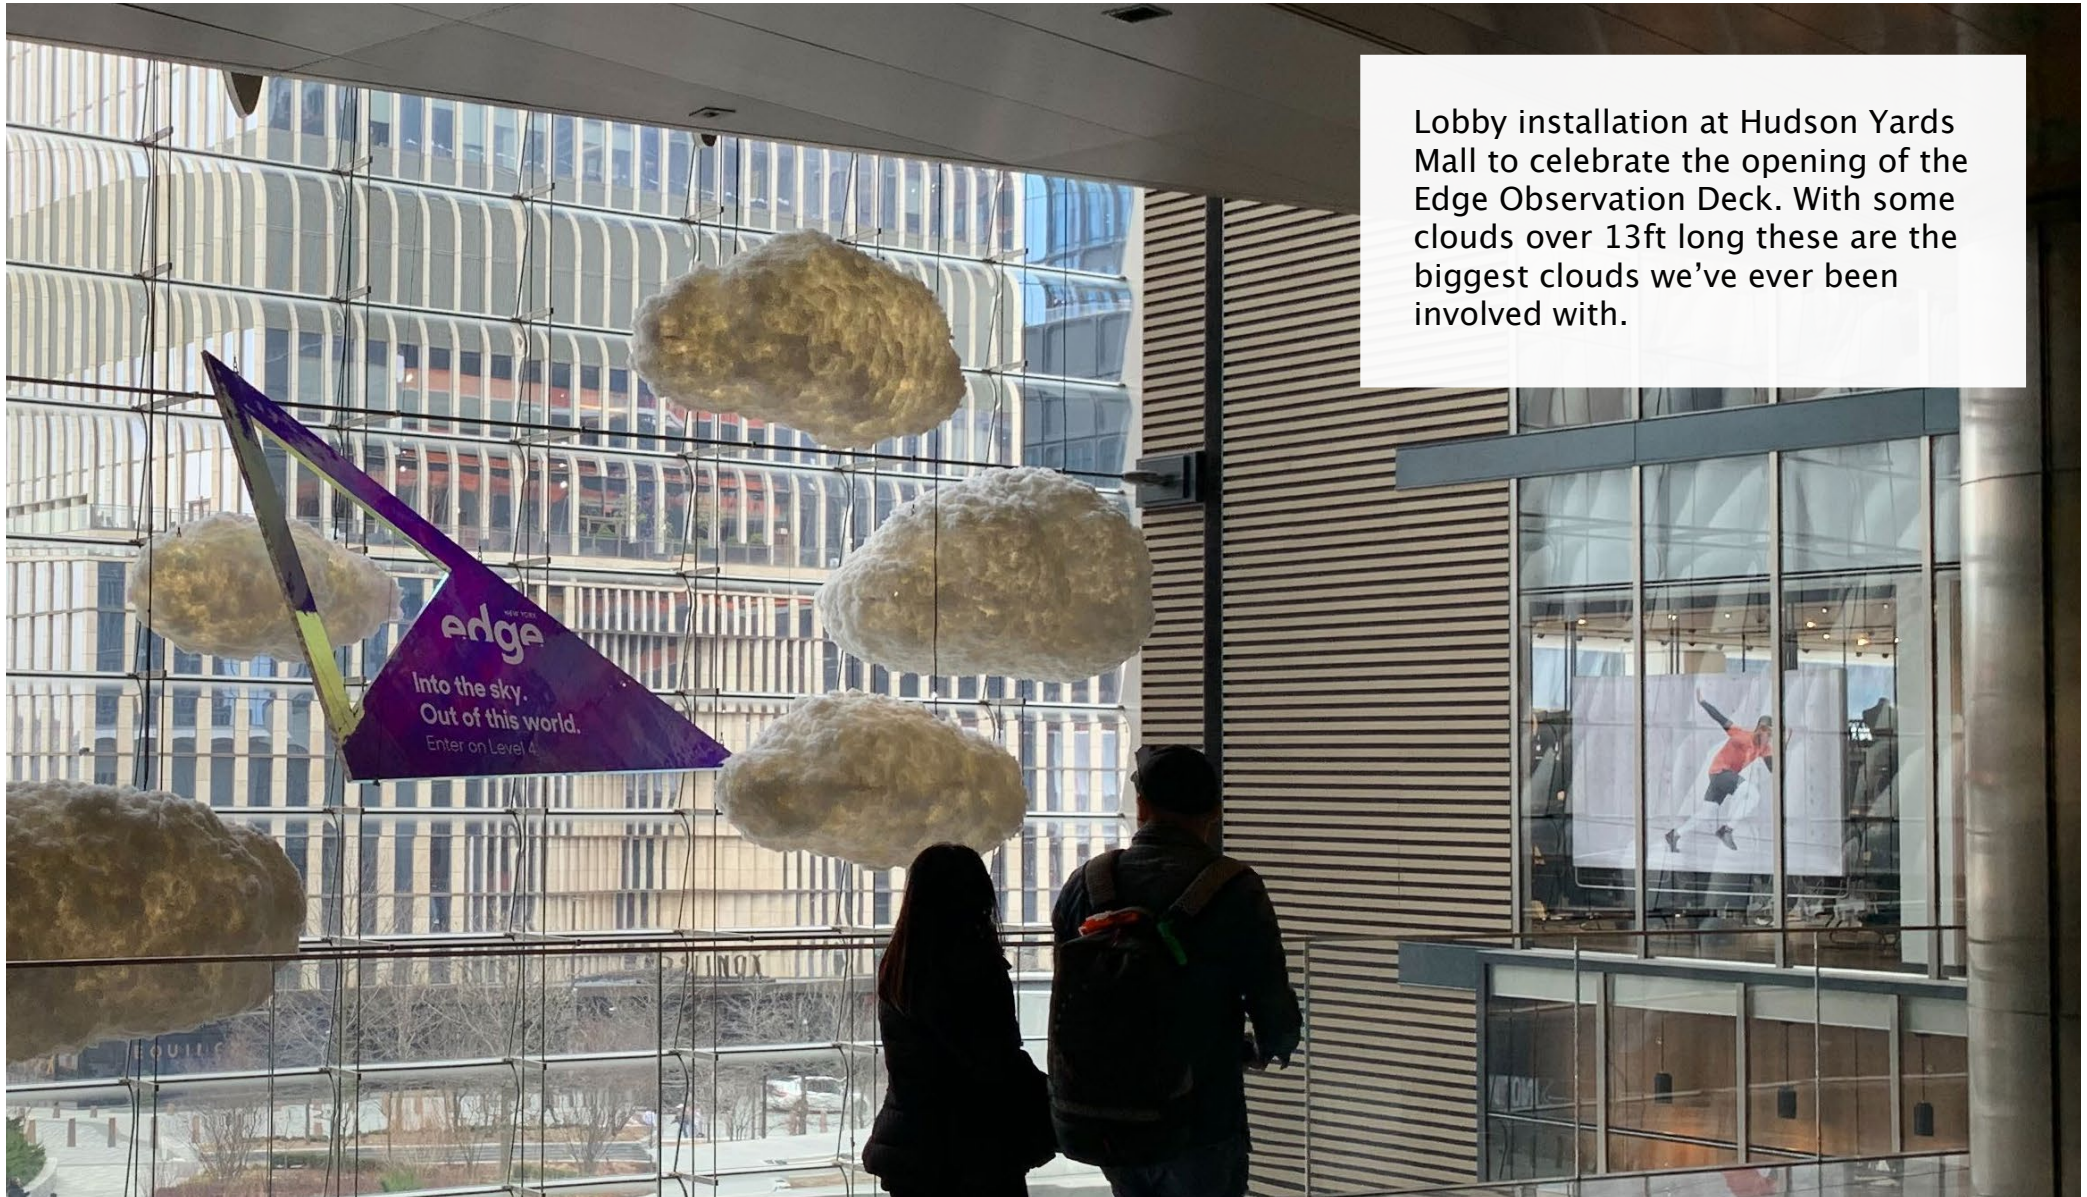

CLOUD CLUSTER

Both our Lampshade Clouds and our Interactive Clouds look great in clusters. Shown here are a number of Large and Medium Lampshade Clouds suspended in our studio office.

HUDSON YARDS CLOUDS

Lobby installation at Hudson Yards Mall to celebrate the opening of the Edge Observation Deck. With some clouds over 13ft long these are the biggest clouds we've ever been involved with.

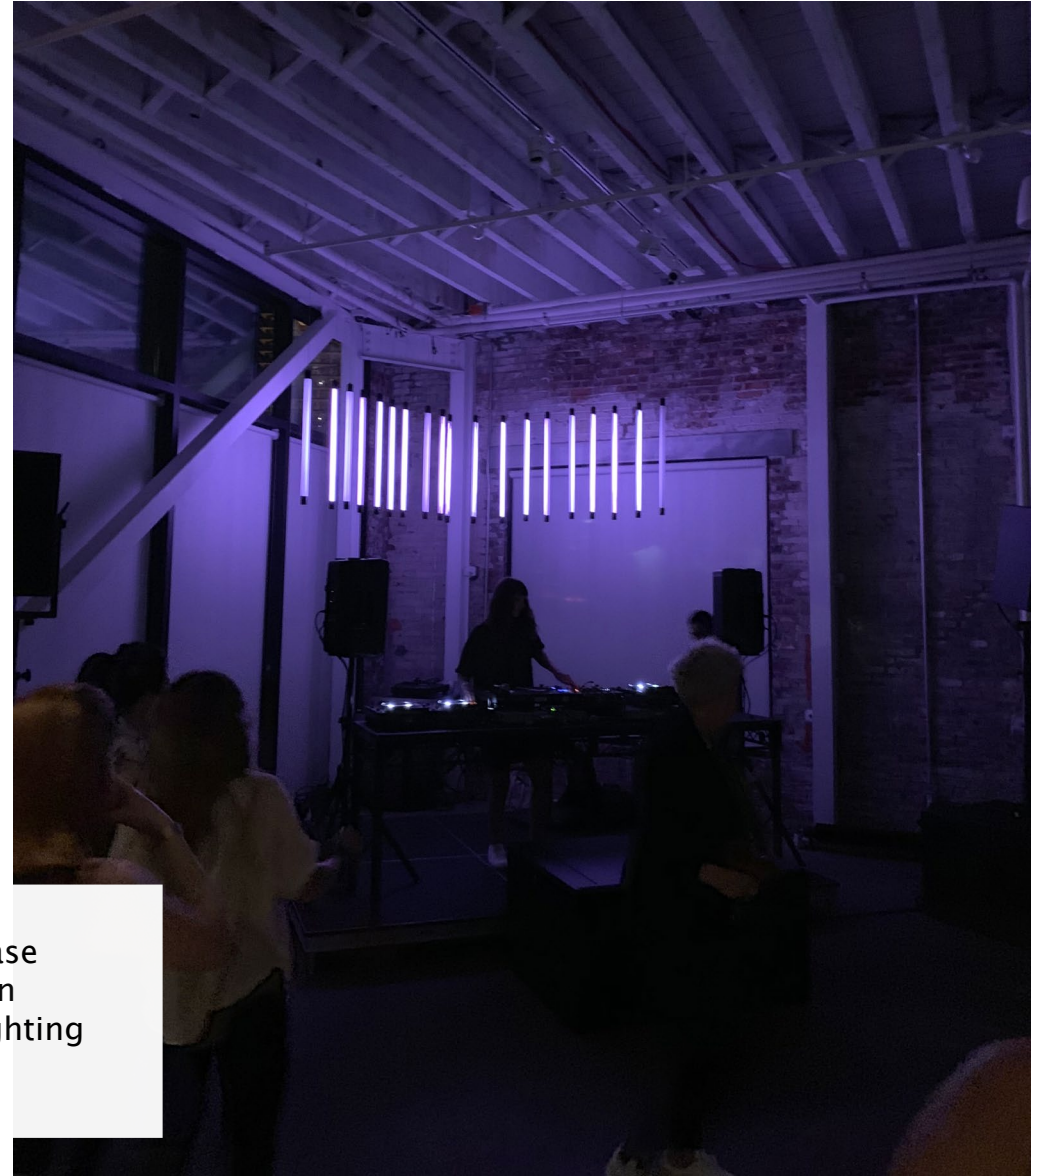

STUDIO OPENING

Every now and again we like to invite friends of the Studio in NYC to come and have an evening under the clouds. These are our Interactive Clouds and once the music gets going its an incredible sight!

ADO SABERS

For Design week 2019 we partnered with the ADO to showcase our Saber lights. As a sound reactive light saber makes for an incredible DJ installation without the need for any DMX or lighting control boards.

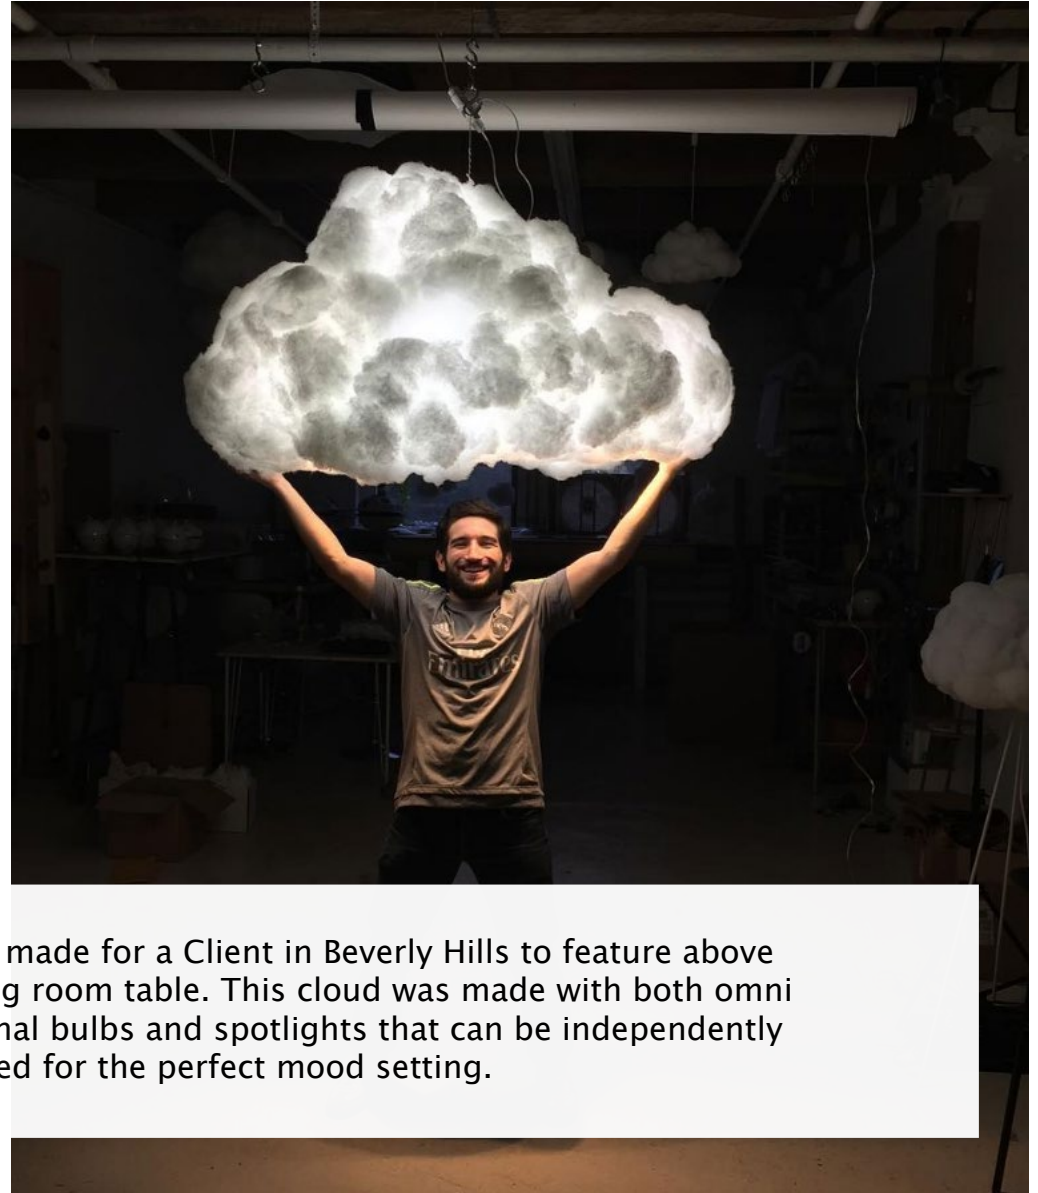

MYTHOLOGY BAR AND RESTAURANT

Poised in DC's 'Atlas neighborhood' Mythology Bar and Restaurant is a themed wonderland of lore and legend like nothing ever seen before. Interior Design by Lee Design and Interiors Richard Clarkson Studio Clouds play a pivotal roll in the style and atmosphere.

90201 CLOUD

Custom made for a Client in Beverly Hills to feature above a dinning room table. This cloud was made with both omni directional bulbs and spotlights that can be independently controlled for the perfect mood setting.

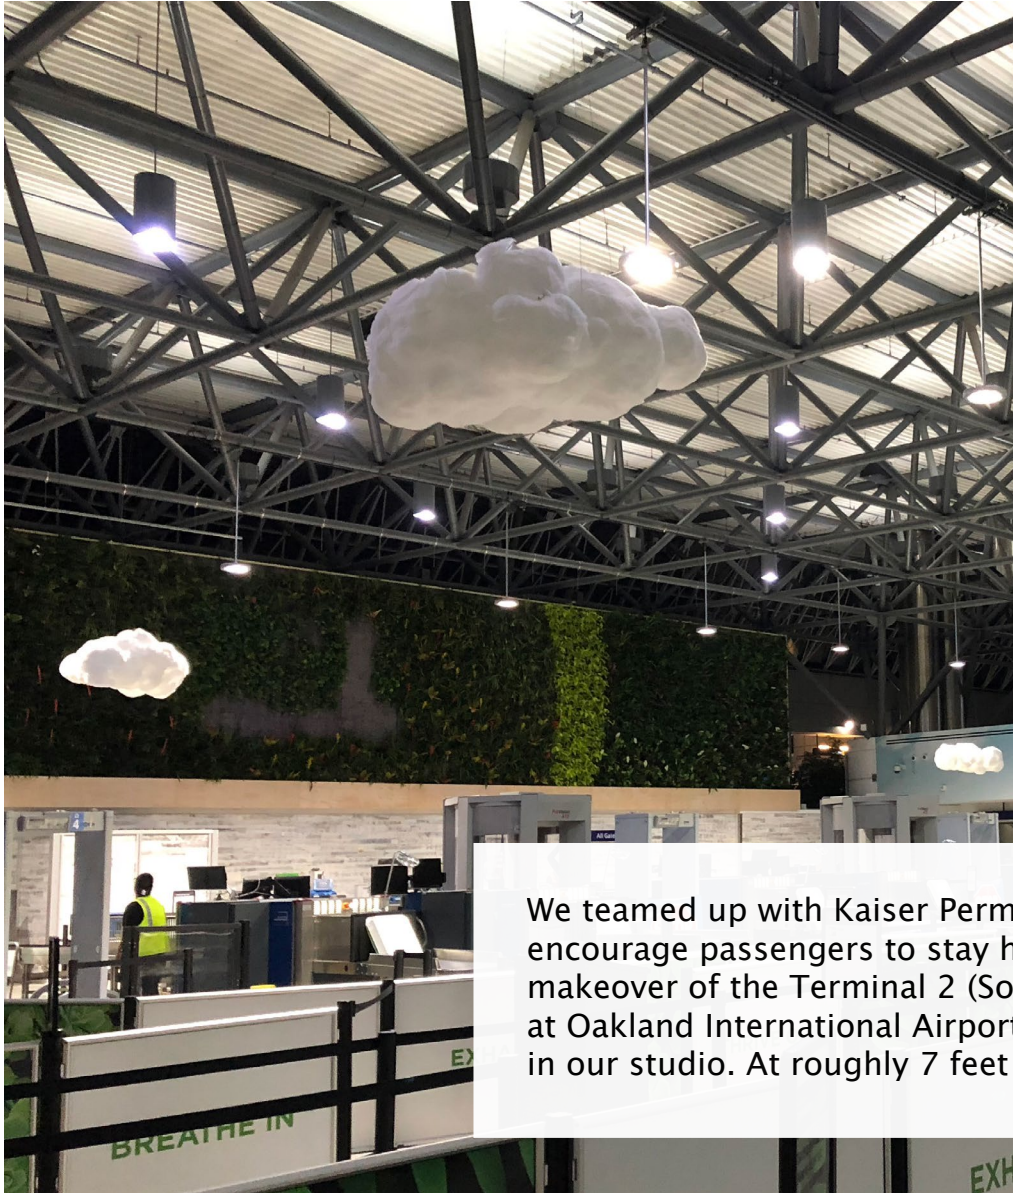

ROOFTOP CLOUDS

Any outdoor installation comes with its own challenges but creating a piece that can brave the winds and sands of a rooftop bar in Dubai was a monumental challenge. We worked with 40 Kong to create this custom installation using a protective globe sphere system – or Cloud bubbles as we came to call them.

CLOUD INSTALLATION FOR OAKLAND AIRPORT

We teamed up with Kaiser Permanent to help cut stress and encourage passengers to stay healthy during the holidays with a makeover of the Terminal 2 (Southwest Airlines) security checkpoint at Oakland International Airport. To the right you can see the Clouds in our studio. At roughly 7 feet long these Clouds are big clouds.

ATOP THE BEEKMAN

Our collaboration with Tinsel Design produced a sky-high experience atop the Beekman Hotel for a select group of VIPs and press. Within the two penthouses, guests mingled under our clouds while dimensional sound design wrapped the space and heightened the feeling of flying
