Ingesting hand sanitizer, which is intended for topical use, could potentially result in alcohol toxicity. Symptoms of alcohol toxicity may range from lack of coordination, slowed or slurred speech, drowsiness to coma, which can be fatal. Furthermore, ingesting alcohol can affect the brain and cause impaired driving or operating heavy machinery. Alcohol can also interact with numerous drugs which may result in serious adverse effects. Ingesting alcohol by people with alcohol addiction may interfere with maintaining abstinence. Additionally, people with alcohol addiction may seek large amounts of ethanol-based hand sanitizers as a substitute. **Ashtel Studios has received no reports of adverse reactions**

The product is intended to be applied topically to help reduce bacteria on the skin that could cause diseases when soap and water are not available and is packaged in 0.84 oz pouches. The product can be identified by **examples of the products pictured below**. Product was distributed to selected retailers in the United States and Canada.
