The Hot List

Cannabis Now presents the ten must-haves of 2022.

It goes without saying, that it's our job, nay, our duty, to connect you, the discerning cannabis consumer with the latest and dopest drops. And there are some hot new products, updated classics and ultra-cool collabs ready for your enjoyment in 2022. From laser-powered bongos to sweet new rigs, your favorite terpenes showing up in drinks, ways to store your score and more—it's going to be a great year for weed gear.

1. ISPIRE / DAAB

If you're a concentrate connoisseur, daab from Ispire is for you. This sleek, induction-heated portable rig gives you the perfect hit at your preferred temperature. A borosilicate glass cup heats precisely—while avoiding contaminants and solvents touching your product—at custom temps ranging from 250° to 800°F. Whether using it for tasty “cold start” dabs or high-temp clouds, induction promises the cleanest and most even heating for the tastiest hits available. shop.getispire.com

2. VIBES / KEITH HARING COLLECTORS TIN

Legendary artist Keith Haring was a creative visionary and a social activist who spread messages of peace, equality and compassion through his iconic artwork. What's more cannabis than that? The Vibes x Keith Haring Collection is a line of functional pop-art pieces for cannabis enthusiasts. These super collectable containers for your pre-rolls and cones come in four designs and are palm-sized—perfect for throwing in your purse or back pocket. vibespapers.com

3. DOSIST / DOSE PEN RECHARGEABLE

Recognized as one of the most advanced vape systems in the world, the new dose pen rechargeable's battery features award-winning design and unmatched technology for the smoothest and most flavorful dose per draw. Driven by dosist's Smart Heat Ramp technology, the new battery is made with 24k gold connector pens; a certified food-grade external shell; breath-activation for ease of use; new three- and six-second dose options; an advanced MCU microprocessor; and a UL1642 certified lithium-ion battery. If you prioritize a controllable, repeatable vape experience, then the new dose pen rechargeable is for you. dosist.com

4. HIGHER STANDARDS / HEAVY DUTY MINI BEAKER

Don't be fooled by the size. This tiny bong may be small, but it's certainly mighty. The Heavy Duty Mini Beaker delivers the same power and performance as the classic Higher Standards Heavy Duty Beaker, but in a compact, portable design. Measuring only eight inches tall, this American-made piece is handcrafted from premium borosilicate glass providing durability, heat resistance and optimal flavor transfer. The cute beaker comes in a sleek and stylish case for safe storage. higherstandards.com

5. HITOKI / THE TRIDENT

This is probably the coolest bong we've seen in a long time. I mean, it's a laser bong. People will lose it when you bring this to a sesh and start burning weed with an actual laser. Created by brothers Joe and Jack Tran, The Trident works in a fashion akin to using sunlight and a magnifying glass to burn flowers with a concentrated beam of light. A healthy alternative to the chemical butane-filled lighters, The Trident's laser combustion process also doesn't alter the true flavor of the flower. hitoki.com

6.

6. EDIE PARKER / STORAGE CASE IN FRUIT PUNCH

While the Edie Parker brand started out as a line of luxury acrylic clutch purses, founder and designer Brett Heyman has moved into cute and covetable high-end cannabis accessories with Edie Parker Flower. These *objets d'art* could easily belong on any contemporary coffee table from Malibu to Manhattan. This line of super-fun acrylic storage boxes is equally practical and playful and will keep your essentials safe until you're ready to spark 'em up. Complete with three colorful compartments, it's perfectly sized for all your smoking *accoutrements*. edieparkerflower.com

7. STÜNDENGLASS / THE KOMPACT

Stündenglass shot to the top of every stoner's wish list when a video of Seth Rogen using an early prototype went viral. Since then, Stündenglass has been acquired by Grenco Science, also known as G Pen, and has become one of the most coveted bongs on the market. At just under a foot, The Kompact brings the same patented 360-degree gravity system, dynamic design and big-cloud energy of the original, but in a more portable package. Being smaller in stature, The Kompact saves space while offering you more control over consumption. stundenglass.com

7.

8. BURB / 420 WAIST BAG

Carry your stash safely and in style with the new lockable 420 Waist Bag from Burb. Manufactured with high-grade X-Pac material, it's durable and weatherproof while looking like luxury, and the combination lock keeps everything secure. There's also a proprietary removable smell-proof pouch in the main compartment, and slots for pre-roll doob tubes. Finally, the strap is made with Snap Tech Hardware for easy adjustment and removal. shopburb.com

8.

9.

9. EYCE / ORAFLEX SERIES HAND-PAINTED SPOON PIPES

The classic spoon pipe is an essential tool in any cannabis consumers' toolkit, and the new Oraflex spoon series is set to be a real must-have. The pipes are made from a double layer of durable silicone and feature an ergonomic grip and a removable borosilicate glass bowl for easy cleaning, as well as a hidden ash poker. The patented outer layer is beautifully glossy, adding a luxurious element while showcasing the stunning range of colors and styles. The pipes are set to take premium silicone smoking products to a new level. eycemolds.com

10. STORZ & BICKEL / VOLCANO HYBRID

Storz & Bickel was the first company to manufacture medically certified cannabis vaporizers. In fact, the original Volcano is often credited for driving the vaporizer revolution. The Volcano Hybrid features all the same high-quality materials and craftsmanship as the original, as well as the iconic convection heating that creates smooth, tasty pulls without overheating your material. Both the Volcano Classic and Volcano Hybrid are available in this very cool black onyx finish. storz-bickel.com *
