## Warm Start

*This set of instructions is for starting your motor when it is still warm. For a cold start, see instructions labeled "1<sup>st</sup> Start" (page 1).*

**2.5hp, 5hp, 6hp**

### To Start:

1. Prime the fuel system by squeezing the bulb on the fuel line (5hp & 6hp).
2. Attach the red safety lanyard to stop switch.
3. Put transmission into neutral.
4. Pull the starter cord. (On a warm start, the motor should start very quickly, if it does not, please refer to the "1<sup>st</sup> Start" document and follow those steps.)
5. Allow the motor to idle and stabilize for at least 1 minute.
6. Have fun with your Hidea Outboard Motor!
