1. Overview

Muzata CT01 hydraulic crimper tool is forged and custom-designed, providing 60KN of crimping force, which is stronger than regular hydraulic crimpers, making it perfect for crimping stainless steel cable railing kits that require more strength and power. Upgraded crimping dies are also more robust and durable. The comfortable ergonomic cushioned handle makes it easy to grip and control.

2. Specifications

3. Operation steps

Tips

Please note that the knob requires an excess of power to be fully tightened . When you find the crimper could not provide enough pressure, **please check the knob and make sure it is fully tightened or need further tightening up.**

Step1 - Turn off the knob.

Step2 - Put in dies.

Step3 - Put in the terminal.

Step4 - turn on the knob.

Step5 - Press the handles repeatedly until the terminal is fully swaged.

Step6 - Turn off to get terminal out.

4. Free design service

We offer custom cable railing design service for free. If you are a beginner or not sure about how to do it, please reach us. Our experts can do all the planning, designing and budget work for you without extra charge.
