

TANITA® SR 901

It's How We Measure.

The Perfect Body Fat Companion

In supplement to our TANITA Visceral Fat readings, the SR-901 measures the thickness of the subcutaneous fat around the abdomen, giving you a full picture of how far you are from achieving the desired six pack. You can also use the SR-901 on any of your body such as your biceps, triceps, quads, etc.

Not only does it measure your six pack subcutaneous fat, it also measures your biceps, triceps and quads.

RRP \$149

Features

- Digital display
- Power On/Off button
- Gender selection button
- Set button
- Electrodes (4)

Product Specifications

- Dimensions: 138x44x26mm
- Product Weight: 90g
- Warranty: 5 years

Measurement in cm	Rating
0.3 - 0.4	
0.5 - 0.9	
1.0 - 1.4	
1.5 - 2.9	
3.0 - 5.0	

Results Table

Through research Tanita has determined a 5 stage indication regarding the thickness of the subcutaneous fat. In order to get that cool six pack, you need to burn the subcutaneous fat that is attached to the top of the stomach.

When the subcutaneous fat is about 4mm the six pack becomes clearly visible (Tanita survey).

So measure, get motivated, train, diet and measure again.
