## Algal DHA

\$1,104.00 per case  
(\$46 / bottle)  
\$74 MAP

## Product Description

### Applications:

- Provides Supplemental Omega-3 DHA from a Non-Fish Source\*
- Provides DHA for Use in Brain, Eye, and Cell Membrane Development and Function\*
- Supports Immune Health and Healthy Eicosanoid Metabolism\*
- Supports Healthy Blood Lipid Levels Already Within the Normal Range\*

Algae DHA contains docosahexaenoic acid (DHA), a conditionally essential omega-3 fatty acid. DHA is highly concentrated in brain synaptosomes, the cerebral cortex, mitochondria, and retina. It plays an important role in the fluidity and permeability of cell membranes and cellular communication and supports optimal function of the brain, eyes, and immune system. This patented, processed formula is derived from marine algae...

ELEMENTALS**

## Alpha-GPC

\$552.00 per case  
(\$23 / bottle)  
\$39 MAP

## Product Description

### Application:

- Supports neurologic health & memory\*
- Aids in cognitive performance\*
- Can enhance growth hormone production\*

Alpha-GPC is one of the most bioavailable forms of choline, which can enhance levels of acetylcholine, an important neurotransmitter in the brain. It is essential to get choline in the diet with primary sources being egg yolk and liver. The body can make choline, however, during periods of high cognitive stress or cognitive demand, levels can quickly be depleted. It is also essential for pregnant and breastfeeding women. There are several genetic variants that can result in a significantly lower production of choline and supplementation can be beneficial.

# AMPK ACTIVATOR

Dihydroberberine

Wholesale Tier-Pricing\* Per Case

CASES	1+	5+	10+	15+	20+	30+
PER CASE	\$672	\$600	\$576	\$552	\$528	By Request
PER BOTTLE	\$28	\$25	\$24	\$23	\$22	By Request

**MAP  
\$55**

*"5x more bioavailable and 2x longer lasting than berberine!"*

AMPK Activator may help:

- Maintain healthy blood glucose levels and improve insulin sensitivity\*
- Promote healthy cholesterol & lipid metabolism\*
- Support blood vessel health\*
- Reduce glycation end products, thought to contribute to biological aging\*
- Eliminate digestive upset that can occur with regular berberine\*
- May help increase plasma BHB ketones.\*

## B-Complex

\$480.00 per case

(\$20 / bottle)

\$32 MAP

## Product Description

Our B-Complex is a high potency blend of the most bioavailable active forms of essential B vitamins for optimal absorption and benefit. While each B vitamin is chemically distinct, they work synergistically in various biochemical functions throughout the body such as supporting cellular energy production and red blood cell formation. \* These bio-active forms also act as coenzymes for the process of detoxification and methylation, processes fundamental for optimal neurological function. \*

B-Complex can support those with:

- Fatigue/low energy
- Elevated homocysteine
- Sleep and mood concerns
- Brain fog
- Poor focus
- Inefficient methylation
- Blood sugar issues

ELEMENTALS**

DHEA 50mg

\$360 per case

(\$15 / bottle)

\$25 MAP

## Product Description

DHEA is a natural steroid hormone that is synthesized from cholesterol through pregnenolone by the adrenal glands. DHEA acts as an antagonist for glucocorticosteroid hormones and is the parent precursor for other important steroid hormones, such as estradiol and other estrogens, and testosterone. While not a precursor to progesterone, DHEA can indirectly influence progesterone synthesis through a feedback mechanism whereby pregnenolone is converted to progesterone based on DHEA levels. DHEA levels drop approximately 10% per decade after age 25.

### Application:

- Hormonal support
- Immune support
- Supports cognitive function
- Supports blood lipid management
- Supports energy metabolism and regulates blood sugar/insulin
- Supports body composition
