

0628CSNE0303HGDD2SW-V1

28MM LOG CABIN, CORNER STANDARD, NO EXTRAS, 3X3M, HALF GLAZED DOUBLE DOORS, TWO SHORT WINDOWS.

BEFORE YOU START PLEASE READ INSTRUCTIONS CAREFULLY

- Check the pack and make sure you have all the parts listed.
- When you are ready to start, make sure you have the right tools at hand (not supplied) including a Phillips screwdriver, Stanley knife, wood saw, step ladder and drill with 2mm bit.
- Ensure there is plenty of space and a clean dry area for assembly.

TIMBER

As with all natural materials, timber can be affected during various weather conditions. For the duration of heavy or extended periods of rain, swelling of the wood panels may occur. Warping of the wood may also occur during excessive dry spells due to an interior moisture loss. Unfortunately, these processes cannot be avoided but can be helped. It is suggested that the outdoor building is sprayed with water during extended periods of warm sunshine and sheltered as much as possible during rain or snow.

BUILDING A BASE

When thinking about where the building and base are going to be constructed: Ensure that there will be access (60cm) to all sides for maintenance work and annual treatment.

Ensure the base is level and is built on firm ground, to prevent distortion. Refer to diagrams for the base dimensions. The base should be slightly smaller than the external measurement of the building, i.e. The cladding should overlap the base, creating a run off for water. It is also recommended that the floor be at least 25mm above the surrounding ground level to avoid flooding.

TYPES OF BASE

- Concrete 75mm laid on top of 75mm hard-core.
- Slabs laid on 50mm of sharp sand.

Whilst all products manufactured are made to the highest standards of Safety and in the case of childrens products independently tested to EN71 level, we cannot accept responsibility for your safety whilst erecting or using this product.

Refer to the instructions pages for your specific product code

All buildings should be erected by two adults

Winter = High Moisture = Expansion
Summer = Low Moisture = Contraction

2mm Drill bit

For ease of assembly, you **MUST** pilot drill all screw holes and ensure all screw heads are countersunk.

CAUTION
Every effort has been made during the manufacturing process to eliminate the prospect of splinters on rough surfaces of the timber. You are strongly advised to wear gloves when working with or handling rough sawn timber.

For ease of assembly use a rubber mallet to fit the log boards. Do **NOT** use a heavy hammer.

Ensure to measure and check before cutting boards.

It is advisable to use a hand saw when cutting roof and floor boards.

To ensure log boards are even, use a spirit level to check each layer has been installed correctly.

Screws & Nails

—
Measure overall length
—

Bolts

—
Measure under the head
—

To identify the fixings required for each step use a measuring tape.

Nail Bag

There may be extra screws present in the nail bag

Pre-assembly

***Please note:**

Each board interlocks at either end in a staggered pattern.

Before securing ensure that the boards are fitted properly in their respective tongues and grooves.

**TO CONSTRUCT A 5M X 3M LOG CABIN
PLEASE REFER TO THE 5X3
INSTRUCTIONS.**

Step 1

The following steps show how to construct a **3m x 3m corner cabin**.
To construct a **5m x 3m cabin**, please refer to the 5m x 3m instructions.

- Parts needed - No. 53 QTY 1**
- No. 54 QTY 1**
- No. 59 QTY 1**
- No. 60 QTY 1**
- No. 61 QTY 1**

Lay the bearers (**No. 53, 54, 59, 60 & 61**) onto a firm and level surface (**free from areas where standing water can collect**) as shown in the illustration.

Fix the bearers together at each corner using 10x70mm screws, ensuring the frame is flush.

Once fully assembled, ensure the bearers are square by measuring from corner to corner, as illustrate, making sure they are an equal measurement. If the bearers are not aligned equally, unscrew and adjust and re-align accordingly.

10x70mm Screws

Example picture
2 screws per bearer per end.

IMPORTANT: Pre-drill before fixing screws.

Step 2

- Parts needed - No. 54 QTY 5**
- No. 55 QTY 1**
- No. 56 QTY 1**
- No. 57 QTY 1**
- No. 58 QTY 1**

Arrange the remaining framing (**No. 54, 55, 56, 57, 58**) as shown in the illustration.

***Ensure there is an equal amount of space between each frame.**

Secure each of the frames in place using 2x70mm screws for each end of each bearer, ensuring the bearers remains level.

36x70mm Screws

IMPORTANT: Pre-drill before fixing screws.

Step 3

- Parts Needed - No. 22 QTY 1**
No. 32 QTY 1
No. 36 QTY 1
No. 40 QTY 1
No. 41 QTY 1

IMPORTANT: Pre-drill before fixing screws.

a Place the starter boards (**No. 22, 32, & 40**) on to the assembled base frame and place the first two log boards (**No.36 & 41**) sitting in the notch as shown.

Ensure the boards sit square on the base using the same method used in Step 1. Measure from corner to corner and ensure they are equal in measurement.

b Once the boards are square, fix the starter boards (**No. 22, 32, & 40**) in place, lift up the log boards (**No.36 & 41**) and fix each starter board in place.

Fix each of the starter boards to the frame by screwing through the notch into the frame with 1x70mm screw as shown in the illustration.

5x70mm Screws

Step 4

- Parts needed - No. 25 QTY 1**

Make the log cabin level by adding another board (**No. 25**) as shown in the diagram. Fix using 1x70mm screw.

****Ensure to stagger the screws so as not to collide with the previous screw.**

1x70mm Screws

IMPORTANT: Pre-drill before fixing screws.

Step 5

- Parts needed - No. 23 QTY 6**
No. 24 QTY 6
No. 33 QTY 6
No. 36 QTY 5
No. 41 QTY 11

Lay the first 6 boards (**No. 23, 24, 33, 36 & 41**) onto the starter boards to create your first level, following the method as shown in the illustrated.

Please note the right hand side of the door will be slightly higher. This will even out when the rest has been assembled.

***Ensure that the boards are level and flush with each other as you lay each one.**

Step 6

**Parts Needed - No. 11 QTY 1
No. 12 QTY 1
No. 13 QTY 1
No. 14 QTY 1**

Arrange the left, right, top & bottom door frames (No's. 11, 12, 13 & 14) onto a level surface. Secure the top and bottom frames to the uprights using 2x80mm screw per corner, ensuring the screws do **NOT** protrude through the front of the door framing.

8x80mm Screws

80mm screw

IMPORTANT : Pre-drill before fixing screws.

Step 7

**Parts Needed - No. 9 QTY 1
No. 10 QTY 1
No. 17 QTY 6**

a The Adjustable Door Hinge (No.17) comes in three parts.

Fasten No. 17a into 17b as shown in the illustration.

b Place the master and secondary doors (No's 9 & 10) onto a flat surface and fix the Adjustable door hinge (No.17c) to the doors using 3x30mm screws per hinge.

Fix 3 x Adjustable Door Hinges (No. 17a & b) into position onto the door frame using 4x30mm screws per hinge.

***Ensure the hinges are fitted to the external of the door frame so the doors open outwards from the log cabin.**

Locate the doors into the hinges ensuring there is equal spacing on each side between the doors and door frame, and that the doors open & close freely without restriction.

It is important to fit the doors within the frames at this stage so that you can establish the position of the hinges. The hinges come in three parts. Remove the doors from the frame after fitting.

****Ensure to screw into the framing and not into the channel.**

42x30mm Screws

30mm screw

IMPORTANT : Pre-drill before fixing screws.

Step 8

To adjust and align your doors:

1. Lift up the doors to separate the two parts of the hinge.
2. Turn the rotating barrel (**No.17a**) in / out to move the position of the doors either in or away from each other.
3. You can then place the door(s) back on to the hinge and check the whether they require more / less adjustments, if further adjustments are required repeat number 2.

Step 9

Once you have laid 6 log boards (*off of the starter*) up the door section, slide the assembled door frame over the boards resting the frame on top of the starter board (**if you have not yet assembled the door frame refer to step 6**)

***Please note:** This image is for illustrative purposes and may differ from your choice in product (**regarding door position**). Nevertheless the process of fitting the door frame is the same.

Step 10

- Parts needed - **No. 23 QTY 6**
No. 24 QTY 6
No. 29 QTY 12
No. 30 QTY 6
No. 31 QTY 6
No. 41 QTY 11

Lay the next 6 boards (**No. 23, 24, 29, 30, 31 & 41**) onto the log cabin to create your second level, following the method as shown in the illustration.

***Ensure that the boards are level and flush with each other as you lay each one.**

Rubber Mallet may be required to fit parts.

Step 11

- Parts Needed - No. 2 QTY 2**
No. 3 QTY 2
No. 4 QTY 2
No. 5 QTY 2

Arrange the left, right, top & bottom window frames (**No's. 2, 3, 4, & 5**) onto a firm and level surface. Secure the top and bottom frames to the uprights using 1x80mm screw per corner, ensuring the screws do **NOT** protrude through the front of the window framing.

Use this method to construct 2 windows.

16x80mm Screws

IMPORTANT : Pre-drill before fixing screws.

Step 12

- Parts Needed - No. 1 QTY 2**
No. 7 QTY 4

Position the window (**No. 1**) so that it sits centrally within the window frame. Fix the female part of the flag hinge (**No. 7**) to the window using 4x30mm screws, attach the male part of the flag hinge (**No. 7**) to the window frame using 4x30mm screws ensuring that the window can open and close freely.

Ensure to attach the hinge to the horizontal frame of the window

Repeat this method for both windows

****It is important to fit the windows within the frame at this stage so that you can establish the position of the hinges. The hinges come in two parts. Remove the window from the frame after fitting.**

32x30mm Screws

IMPORTANT : Pre-drill before fixing screws.

Step 13

Once you have laid the second level of boards onto the log cabin slide the windows between the smaller boards and rest on to the longer board (*if you have not yet assembled the window frames refer to step 11*)

***Ensure the boards are level with each end.**

***Please note:** This image is for illustrative purposes and may differ from your choice in product (**regarding window position**). Nevertheless the process of fitting the window is the same

Step 15

Parts needed - No. 26 QTY 1

Make the log cabin level by adding another right hand board (**No. 26**) as shown in the diagram.

Step 14

**Parts needed - No. 23 QTY 6
No. 24 QTY 5
No. 29 QTY 12
No. 30 QTY 6
No. 31 QTY 6
No. 41 QTY 12**

Lay the next 6 boards (**No's. 23, 24, 29, 30, 31 & 41**) onto the log cabin, following the method as shown in the illustration, bringing the board level to the top of the window and door frames.

Please note when you get to the top of the boards the right hand boards will be slightly lower.

****Ensure that the boards are level and flush with each other as you lay each one.**

Step 16

**Parts needed - No. 28 QTY 1
No. 35 QTY 1
No. 37 QTY 1
No. 41 QTY 2**

Lay the next layer of boards (**No.28, 35, 37 & 41**) onto the log cabin, following the method as shown in the illustration, bringing the board level above the window and doors.

***Ensure that the boards are level and flush with each other as you lay each one.**

Step 17

**Parts needed - No. 27 QTY 1
No. 34 QTY 1
No. 36 QTY 1
No. 41 QTY 2**

Lay the next layer of boards (**No. 27, 34, 36 & 41**) onto the log cabin, following the method as shown in the illustration.

***Ensure that the boards are level and flush with each other as you lay each one.**

Step 18

**Parts needed - No. 38 QTY 1
No. 39 QTY 1**

Lay the Finisher Boards (**No. 38 & 39**) onto the front of the log cabin to bring the boards level. Fix into position with 2x70mm screws per board by screwing through the notches.

***Ensure that the boards are level and flush with each other as you lay each one.**

4x70mm Screws

IMPORTANT: Pre-drill before fixing screws.

Step 19
Parts needed - No. 74 QTY 1

**** Please Note:**
You can place your gable on either side of the log cabin, dependant on your needs. (See Contents page for reference)

Please ensure to construct your Roof by following either 'Roof Assembly 1' or 'Roof Assembly 2', dependant on which side you place the Gable.

Place the gable top (No. 74) onto the log cabin. Fix into position by screwing through the notches as shown in the illustration.

*Ensure that the boards are level and flush with each other as you lay each one.

2x120mm Screws

IMPORTANT: Pre-drill before fixing screws.

Roof Assembly 2

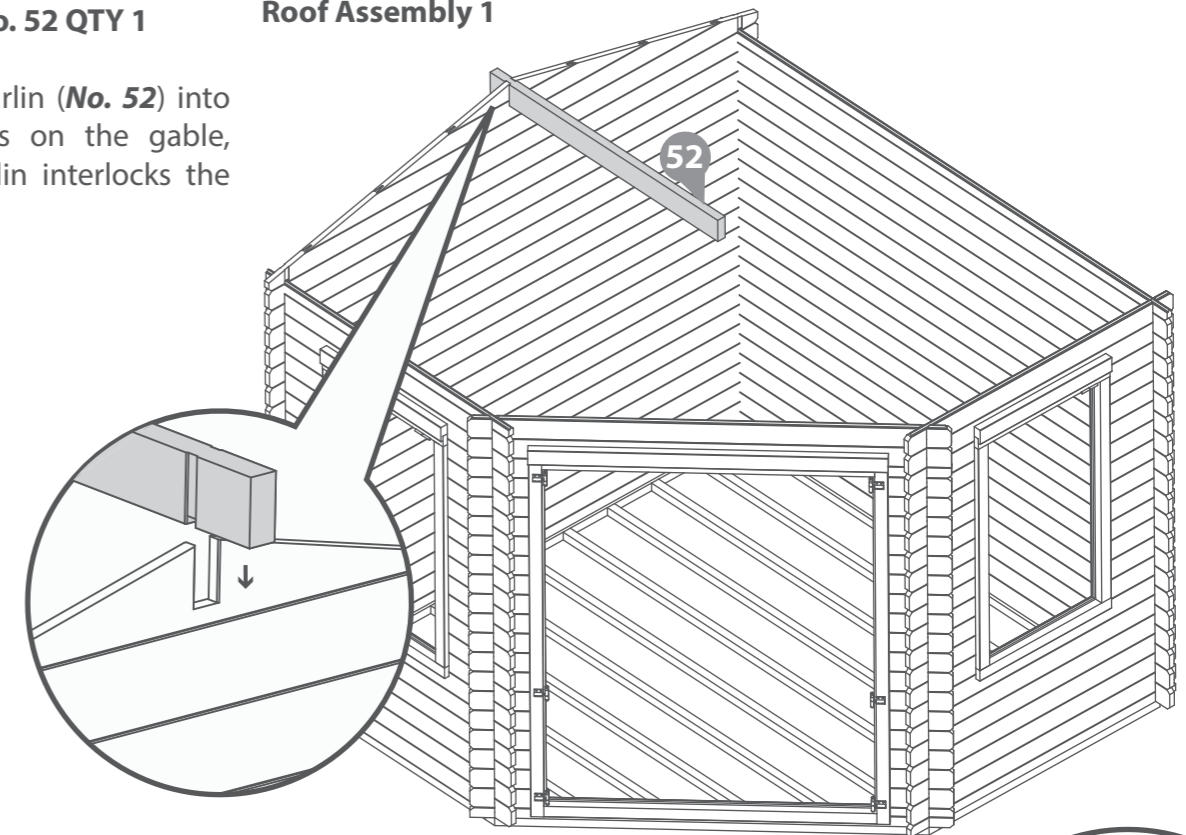

Step 20
Parts needed - No. 50 QTY 1
No. 51 QTY 1
No. 52 QTY 1

Align the Roof Purlin (No. 52) into the cut out slots on the gable, ensuring the purlin interlocks the boards.

IMPORTANT: Pre-drill before fixing screws.

Roof Assembly 1

Roof Assembly 2

Step 21 - Roof Assembly 1

Parts needed - No. 48 QTY 1
No. 50 QTY 1
No. 51 QTY 1

Place the Central roof Truss ' Roof Truss D (No.51) flush to the end of the Roof Purlin (No. 52)

Place Roof Truss C (No.50) and Roof Truss A (No.48) onto either side of the Roof Purlin (No.52) ensuring they sit flush to the end, creating a 'T' shape as shown in the illustration.

Fix in place by screwing through the truss into the Purlin at an angle, as shown in the illustration using 1x90mm screw per truss.

3x90mm Screws

IMPORTANT: Pre-drill before fixing screws.

Roof Assembly 1

Step 22

Parts needed - No. 49 QTY 1

Place 'Roof Truss B' (No. 49) between Roof Truss A (No.48) and the Central Roof Truss (Truss D for Roof Assembly 1, and Truss C for Roof Assembly 2) as shown in the illustration.

Fix in place by screwing into the purlin at an angle as shown in the illustration using 1x90mm screw.

***Ensure to stagger screws to avoid screws colliding.**

1x90mm Screws

IMPORTANT: Pre-drill before fixing screws.

Roof Assembly 1

Step 21 - Roof Assembly 2

Parts needed - No. 48 QTY 1
No. 50 QTY 1
No. 51 QTY 1

Place the Central roof Truss Roof Truss C (No.50) flush to the end of the Roof Purlin (No. 52)

Place Roof Truss D (No.51) and Roof Truss A (No.48) onto either side of the Roof Purlin (No.52) ensuring they sit flush to the end, creating a 'T' shape as shown in the illustration.

Fix in place by screwing through the truss into the Purlin at an angle, as shown in the illustration using 1x90mm screw per truss.

3x90mm Screws

Roof Assembly 2

Roof Assembly 2

Step 23
Parts needed - No. 48 QTY 3

Place 2x 'Roof Truss A' (No. 48) flush to the inside of the gable.

Fix in place by screwing into the purlin at an angle as shown in the illustration using 1x90mm screws per Roof Truss.

**Ensure to stagger screws to avoid screws colliding.*

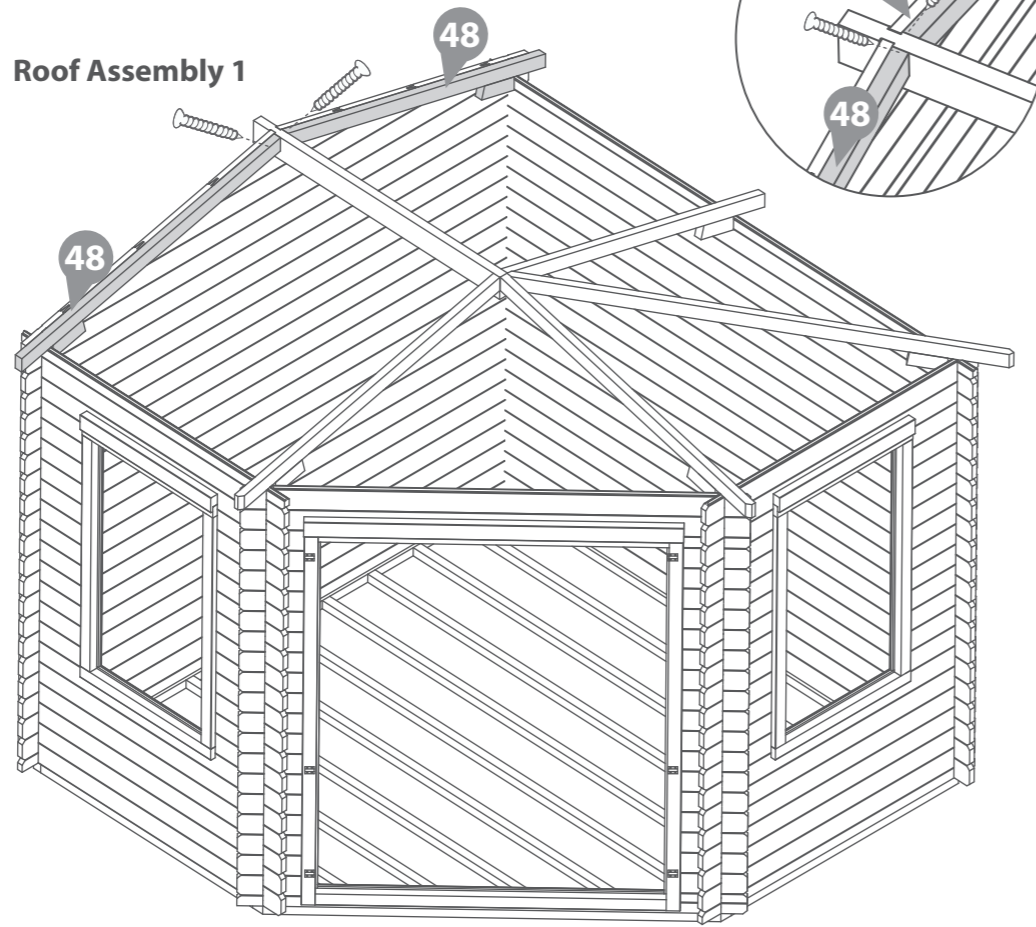

2x90mm Screws

Please note: You can adjust the blocks attached to the roof truss' if necessary.

IMPORTANT: Pre-drill before fixing screws.

Roof Assembly 1

Roof Assembly 2

Step 24
Parts needed - No. 46 QTY 1
No. 47 QTY 1

Secure the shortest Roof Truss' (No. 46 & 47) to 'Roof Truss B' (No.49) as shown in the illustration using 1x90mm screws per truss.

**Ensure the angled side of the short truss is flush with the side of the long truss. Then make sure the block under the short truss is flush against the wall of the building.*

**Ensure to stagger screws to avoid screws colliding.*

2x90mm Screws

Please note: You can adjust the blocks attached to the roof truss' if necessary.

IMPORTANT: Pre-drill before fixing screws.

Roof Assembly 1

Roof Assembly 2

Step 25

Parts needed - No. 42 QTY 1
 No. 43 QTY 1
 No. 44 QTY 1
 No. 45 QTY 6

Place the finisher boards (No. 42, 43, 44 & 45) around the building, locating each board flush to the truss.

Ensure there is at least a 42mm gap between parts No. 45 & 45 on both sides of the log cabin.

Some adjustment may be required to ensure the roof structure rests correctly.

Secure each board by screwing into the Roof Truss, using 2x70mm screws per board, ensuring to stagger the screws to avoid colliding.

14x70mm Screws

Roof Assembly 1

Roof Assembly 2

IMPORTANT: Pre-drill before fixing screws.

Step 26

Parts needed - No. 48 QTY 2

Locate the last two 'Roof Truss A' (No. 48) into the 42mm gaps between the finisher boards No.45 & 45 as shown in the illustration.

Some adjustment may be required to ensure the roof structure rests correctly.

Fix in place by screwing into the purlin at an angle as shown in the illustration using 1x90mm screws per Roof Truss.

Secure the boards (No.45) in place by screwing through the purlin using 1x70mm screw per board, ensuring to stagger the screws to avoid colliding.

4x70mm Screws
2x90mm Screws

Rubber Mallet may be required to fit parts.

Please note: You can adjust the blocks attached to the roof truss' if necessary.

IMPORTANT: Pre-drill before fixing screws.

Roof Assembly 1

Roof Assembly 2

Step 27

You can now fix the assembled roof truss's and Roof Purlin to the log cabin, making sure the attached blocks sit inside the assembly.

Some adjustment may be required to ensure the roof structure rests correctly.

Once in position fix the roof truss' to the log cabin using 1x120mm screw per truss as shown in the diagram. Ensure to stagger screws to avoid colliding.

Secure the Roof Purlin to the log cabin by screwing through the purlin into the gable using 2x70mm screws

10x120mm Screws
2x70mm Screws

IMPORTANT: Pre-drill before fixing screws.

Roof Assembly 1

Roof Assembly 2

Step 28

Parts needed - No. 71 QTY 1 Pack A
No. 72 QTY 2 Pack B
No. 73 QTY 2 Pack C

***HINT: keep the roof board packs separate to prevent mixing them up.**

Place the first board from each 'Roof Board Pack' (**A, B, & C**) onto the roof assembly, working around the structure, building each layer of roof boards one by one.

Once you are happy with the fit of the roof boards, fix the boards into place using 2x40mm screws per board, ensuring to fix through the roof board into the truss below.

28x40mm screws

Roof Assembly 1

Roof Assembly 2

Roof Assembly 1

Roof Assembly 2

Step 29

**Parts needed - No. 71
No. 72
No. 73**

***HINT: keep the roof board packs separate to prevent mixing them up.**

Continue arranging the Roof Board Packs (A, B, & C) onto the roof assembly, working around the structure, building each layer of roof boards one by one.

Ensure the roof boards are not laid too close together, use the spacers (No.69) provided to create a 2mm gap. Adjusting the spacing between the boards allows the wood to swell in damp weather.

Once you are happy with the fit of the roof boards, fix the 2nd, 3rd & 4th boards into place using 40mm screws, ensuring the screws fix through the roof board into the truss below.

Repeat this so you have 4 boards screwed down in total on each of the 5 sides.

84x40mm Screws

IMPORTANT: Pre-drill before fixing screws.

Roof Assembly 1

Roof Assembly 2

Step 30

**Parts needed - No. 71
No. 72
No. 73**

***HINT: keep the roof board packs separate to prevent mixing them up.**

Continue arranging the roof board packs (A, B, & C) onto the roof assembly, working around the structure, building each layer of roof boards one by one.

Ensure the roof boards are not laid too close together, use the spacers (No.69) provided to create a 2mm gap. Adjusting the spacing between the boards allows the wood to swell in damp weather.

Once you are happy with the fit of the roof boards, fix the 5th, 6th & 7th boards into place using 40mm screws, ensuring the screws fix through the roof board into the truss below.

Repeat this so you have 7 boards high screwed down in total on each of the 5 sides.

84x40mm Screws

IMPORTANT: Pre-drill before fixing screws.

Roof Assembly 1

Roof Assembly 2

Step 31

Parts needed - No. 71
No. 72
No. 73

***HINT: keep the roof board packs separate to prevent mixing them up.**

Continue arranging the roof board packs (A, B & C) onto the roof assembly, working around the structure, building each layer of roof boards one by one.

Ensure the roof boards are not laid too close together, use the spacers (No.69) provided to create a 2mm gap. Adjusting the spacing between the boards allows the wood to swell in damp weather.

Once you are happy with the fit of the roof boards, fix the 8th, 9th & 10th boards into place using 40mm screws, ensuring the screws fix through the roof board into the truss below.

Repeat this so you have 10 boards high screwed down in total on each of the 5 sides.

84x40mm Screws

IMPORTANT: Pre-drill before fixing screws.

Roof Assembly 1

Roof Assembly 2

Step 32

Parts needed - No. 71
No. 72
No. 73

***HINT: keep the roof board packs separate to prevent mixing them up.**

Continue arranging the roof board packs (A, B & C) onto the roof assembly, working around the structure, building each layer of roof boards one by one.

The last two boards from Pack C will overhang.

Using a pencil and a straight edge, mark out the line as a guide.

Cut along the pencil mark and remove the excess. Place the cut down board's back onto the roof.

Once you are happy with the fit of the roof boards, fix the remaining boards into place using 40mm screws, ensuring the screws fix through the roof board into the truss below.

Repeat this so you have the rest of the boards screwed down on all of the 5 sides.

140x40mm screws

IMPORTANT: Pre-drill before fixing screws.

Roof Assembly 1

Roof Assembly 2

Step 33

Lift each window onto the already existing hooks on the window frame, ensuring the hook and bands connect.

***Some adjustment may be required to align properly.**

Step 35

Lift each door onto the already existing hooks on the door frame, ensuring the hook and bands connect.

***Some adjustment may be required to align properly.**

Step 34

Parts Needed - No. 8 QTY 2

Fix the casement stay (**No. 8**) onto the window (**No. 1**) and the casement stay pins to the window framing using 6x30mm screws.

***Ensure the casement stay is centralised on the window.**

Use this method to fit the casement stays to both the windows.

12x30mm Screws

Step 36

**Parts Needed - No. 18 QTY 1
No. 19 QTY 1
No. 20 QTY 1**

a Fit the Mortice lock (**No. 19**) into the recess in the master door (**No. 9**) and secure using the screws provided. Attach the Key plate (**No. 20**) to the secondary door (**No. 10**) with 4x30mm screws.

b Fit the door handles (**No. 18**) and connect with the metalbar to the mortice lock using 8x30mm screws. Ensure the lock mechanism closes correctly. If not, remove the lock and turn the catch around using the small grub screw.

****Please note:** This image is for illustrative purposes and may differ from your choice in product (regarding ironmongery). Nevertheless the process of fixing the frames is the same. Once components have been fitted, try closing doors to ensure the doors can be closed and the lock works. If your doors do need adjusting please refer to the step 8, if not proceed to step 37*

12x30mm Screws

Pre drill hole
30mm screw

Step 37

**Parts Needed - No. 15 QTY 1
No. 21 QTY 2**

a Attach the door strip (**No. 15**) to the back of secondary door using 4x40mm screws as shown in the illustration.

b Once fixed, place the Tower Bolts (**No. 21**) roughly into position and with a pencil mark around the bolt.

c After marking the bolt onto the frame, drill a hole for the barrel bolt to locate into.

d Following the hole being drilled, place the tower bolts into position and secure using the screws provided.

12x40mm Screws

Pre drill hole

40mm screw

Step 38

Parts needed - No. 68

Measure and cut the felt (No.68) using the dimensions given below as a guide.

Lay the first piece of felt (1- 1585mmX1000mm) onto the roof as shown (1) and cut down to the individual shape of the roof.

Continue this method for each piece of felt (2-8) in the order as shown, ensuring a 50mm overlap between each piece.

Secure along the outer edge of each felt section using felt tacks spaced out at approximately 100mm intervals.

**Ensure there is 50mm of overhanging felt around the base of the roof.*

600x Felt Tacks

Felt sheet dimensions:

- 1 - 1600mm (L) x 1000mm (W)
- 2 - 2303mm (L) x 1000mm (W)
- 3 - 1655mm (L) x 1000mm (W)
- 4 - 3141mm (L) x 1000mm (W)
- 5 - 1600mm (L) x 1000mm (W)
- 6 - 820mm (L) x 1000mm (W)
- 7 - 680mm (L) x 1000mm (W)
- 8 - 2180mm (L) x 1000mm (W)

Roof Assembly 1

Roof Assembly 2

Step 39

Parts needed - No. 68

Measure and cut the remaining felt (No.68) using the dimensions given below.

Lay the first strip (1- 300mmX-200mm) onto the roof as shown (1), ensuring it is overlapping the previously placed sheets.

Continue this method for each of the felt strips (2-4)

Secure along the outer edge of each felt section using felt tacks spaced out at approximately 100mm intervals.

250x Felt Tacks

Felt strip dimensions:

- 1 - 1600mm (L) x 200mm (W)
- 2 - 2340mm (L) x 200mm (W)
- 3 - 1700mm (L) x 200mm (W)
- 4 - 1710mm (L) x 200mm (W)

Roof Assembly 1

Roof Assembly 2

Step 40

Parts needed - No. 70 QTY 1

Place the floor boards (**No. 70**) inside the building flush to the log boards on one side.

Continue adding the floor boards (*internally*) making sure to interlock each individual board.

***Do NOT secure the boards until the last board has been measured and cut.**

Following the same method outlined previously measure the gap between the bottom of the tongue (**on the last board placed**) and the log board.

Using a straight edge mark out the measurement onto the last floor board (**No. 70**) and cut along the length removing the excess.

****Please note:** Mark the final board 2mm under the measurement; This will allow the timber to expand and contract correctly.

Once all the floor boards are in position secure each board into position using 8x40mm screws per board.

*****Please Note:** Ensure to screw through each of the floor boards into the floor bearers.

200x40mm Screws

This is for illustrative purposes only and may differ from your floor.

Step 41

Parts needed - No. 67 QTY 7

Inside the building place the closure trim (**No. 67**) against the boarding and align with the roof as shown in the illustration.

***Measure and cut the closure trims to fit the internal space.**

Once in position fix each trim into place by pre drilling a pilot hole and using 6x30mm screws per trim, equally spacing them along the face of the board.

42x30mm Screws

Step 42

Parts needed - No. 67 QTY 7

Once the floor has been laid arrange the closure trim (**No. 67**) around the outside edge of floor (*internally*), measure and cut down accordingly to best match the internal space.

Secure each trim section into place using 6x30mm spaced equally along the board as shown in the illustration.

***Do NOT fix the closure trim to the floor boards.**

42x30mm Screws

IMPORTANT: Pre-drill before fixing screws.

IMPORTANT: Pre-drill before fixing screws.

Step 43

- Parts needed - No. 62 QTY 1**
No. 63 QTY 1
No. 64 QTY 2
No. 65 QTY 2

Attach the first fascias (**No.62 & 65**) to the back sides of the log cabin, ensuring to trap the felt between the fascia and the building.

Secure the fascia into position using 4x40mm screws, making sure to fix through the fascia into the roof purlin, fascia block and/or log boards.

Once in place, mark the excess fascia with a pencil and then trim the fascias to follow the shape of building as shown in the illustration.

Attach the rest of the fascias (**No. 63, & 64**) to the front sides of the log cabin and cut to size in the same way as previously stated.

34x40mm Screws

IMPORTANT: Pre-drill before fixing screws.

Step 44

- Parts needed - No. 66 QTY 8**

Arrange the storm braces (**No. 66**) around the building (*internally*). Place 2x storm braces per side fixing into place using 2x 70mm bolts per brace making sure the washer & nut are tightened from the outside of the building.

***Ensure the storm braces are secured at the highest point possible on each side.**

The storm braces will need to be altered during the buildings life as the moisture content within the log boards changes. The boards will expand during periods of high moisture (Winter) and shrink during periods of low moisture (Summer.)

****Storm braces will help your building expand and contract properly.**

*****It is important that each bolt is tightened using a washer so as not to damage the log boards.**

16x70mm Bolt Sets

Step 45
Parts Needed: No. 6 QTY 2
No. 16 QTY 1

Attach the Rain Guards (**No.6**) to the window frame, fixing in place onto the framing above each window using 3x70mm screws per guard.

Attach the Rain Guard (**No.16**) to the door frame, fixing in place onto the framing above the Door using 3x70mm screws.

9x70mm Screws.

Pre drill hole

70mm screw

It is ESSENTIAL that you apply wood treatment immediately after the building has been assembled.
