

Here are some helpful hints for proper use of the

# Chill Station

*In order to be sure bottles maintain the proper temperature for serving;*

## 1 Proper placement of ice is key

the ice compartment holds up to 3.3 quarts (3.1 liters) of ice and can be filled to capacity. A small amount of ice should also be placed within the cooling sleeve to maintain proper temperature.

## 2 Thoroughly chill bottles prior to placing in cooling sleeve

stainless steel sleeve will maintain temperature of chilled bottles. Place bottle in refrigerator or freezer until chilled to desired temperature.

*\*temperatures noted vary depending on type of alcohol and preference*
