

All Andover-One series products are constructed from natural genuine hardwoods and veneers protected with a clear matte lacquer finish. This allows the natural beauty of the wood to show through unaltered. Because no two pieces of wood are ever truly alike, some color and grain variation from panel to panel, or unit to unit will naturally occur. This contributes to the beauty and uniqueness of each piece.

To care for your wood finish, maintain a regular dusting routine using a soft, lint-free microfiber cloth. To remove stubborn dirt or stains that may appear, use a damp cloth with a touch of mild dish soap. Immediately wipe any soap residue off with a clean towel dampened with clear water, and quickly dry the surface with a soft towel. Do not use harsh chemical cleaners. If the finish becomes dull over time, application of a quality Tung Oil finish will restore its lustre.

Note: The fresh finish on a new product will alter slightly in the first few weeks after unpacking. Do not be concerned if you notice this slight change as it is a natural reaction to initial exposure to UV light and chemicals in the air. A unit that has been unpacked for a few weeks may not match a freshly unpacked unit. After a short time the finish will stabilize and will maintain its rich natural beauty for many years.
