

ANDOVER-ONE

Finely crafted all in one turntable music system

ANDOVER ONE - TURNTABLE MUSIC SYSTEM

Much more than just a “record player”, the Andover-One is everything you need to deliver incredibly satisfying, room-filling sound in one compact box. It’s the simplest way to enjoy records, streaming audio, and optional analog or digital sources with premium sound, without complex wiring or excessive space requirements. Its graphic interface and full-function remote control provide plenty of flexibility with intuitive simplicity.

Previously, it was impossible to house audiophile-quality speakers with powerful bass response in the same housing as a light-tracking turntable without ruining record playback. Andover’s exclusive patent pending Isogroove® technology makes it possible without stylus skipping or acoustic feedback. The result is an award-winning system that is the least complicated route to great sound, and is compact enough to fit beautifully in any room. A custom made Pro-Ject turntable and aptX HD Bluetooth internal sources deliver excellent reproduction of Vinyl LP’s and Digital Files. In addition, inputs for analog and digital sources, and outputs for external speakers, subwoofer, or computer let you expand and customize your system.

The Andover-One’s AMT folded-ribbon tweeters and four aluminum-diaphragm woofers provide smooth, accurate full-range sound with a wide sound stage that respected audio reviewer Michael Fremer said “...is literally, mind-blowingly good.” The Neo Mid Century Modern styling, featuring genuine solid Walnut hardwood, looks great in any setting. Optional matching modular stands and subwoofer may be added to create a truly stunning system that takes up less than 1-3/4 sq.ft. of floor space. ANDOVER-ONE is the perfect companion for those who love music more than equipment.

SPECIFICATIONS

Audio System

- Isogroove® feedback elimination technology
- Bi-amplified audio system with 200W total power
- 6 speaker audio system
 - Four 3.5" ultralinear aluminum-diaphragm woofers
