## SPINBASE - TURNTABLE SPEAKER SYSTEM

---

"It's impossible", they said.

"Placing a turntable anywhere near a speaker is a recipe for sonic disaster!"

But that was B.S. (Before SpinBase).

SpinBase is the first powered speaker system specifically designed to support a turntable. Thanks to its proprietary Isogroove® technology, SpinBase delivers superb, room-filling sound from your turntable, Bluetooth, or auxiliary source without creating the vibrations that would upset your turntable with regular speakers.

Its space efficient 18" x 13.5" footprint creates a perfect platform for your turntable, letting you assemble a high-quality stereo music system in the least possible space without the usual wiring and setup hassles. The 270° dispersion of SpinBase's four high-performance internal speaker drivers fills your room with a spacious musical presentation that earned Tech Hive's coveted "Editor's Choice" designation. Its Bluetooth 5.1 receiver makes it easy to play music from your phone or portable music player. You can also add any standard line-level source like a CD player, WiFi streamer, legacy tape deck, or a turntable that has its own built-in preamp.

Spinbase's high-performance/low-noise phono preamplifier is superior to those built into most turntables, delivering the clear well-balanced sound for which Andover is known.

And, if you're upgrading from a lower-priced record player equipped with a Ceramic cartridge, the exclusive Ceramic EQ makes your record player sound closer to the superior sound of a Magnetic Cartridge.

It works great with virtually any turntable you have, or with one of ours.

The operation is exceedingly simple and intuitive, making satisfying High-Fidelity sound affordable and accessible to virtually anyone.

Impossible? No.

Impressive? You be the judge...

## SPECIFICATIONS

---

### Audio System

- Isogroove® feedback elimination technology
- Stereo Two-Way vented speaker system
- 2x Soft-dome tweeters
- 2x Active woofers
- 270° Sound field
- Bluetooth
- Bass + Treble EQ controls
- Ceramic cartridge switch

### Design

- Available in White or Black
- Perforated metal wrap-around grille
- MDF enclosure
- Internal bracing for enclosure rigidity
- Dimensions\*: 18in(46cm) Wide x 3.25in(8.25cm) High x 13.5in(34cm) Deep

\*Accommodates most common turntables
