

Series One assembly instructions

Tables and Benches:

1 - Place a blanket or another protective covering onto the floor and then place the top upside down on it.

2 - Line up the screw on the end of the leg with the threaded metal insert under the top and turn clockwise. Ensure you screw in the leg at the appropriate angle. The leg and the rebate under the top must be in full contact in order to achieve a proper fit.

3 - *DO NOT* turn up the furniture by using the legs as leverage. Instead, lift the piece off the ground by its top and carefully turn it right ways up.

4 - You may need to occasionally tighten the legs.
