

LABCON PIPET TIPS

For Rainin® LTS™ Pipettors

labcon®

The Earth Friendly® Company

Bring Labcon's higher quality, performance, and sustainability to ergonomic pipetting.

REDUCED THUMB STRAIN
Pipet tips mount and eject with less force than twisting the cap on a water bottle (less than 3Kg).

FLEXIBLE TOP
Uniquely thin and flexible top conforms and seals easily to pipet barrels.

VALIDATED QUALITY
Products are lot tested to ensure quality, purity, and performance. Registered to ISO 9001:2015 quality management system.

SUSTAINABLE PACKAGING
Designed for a low environmental impact, incorporating renewable and/or recyclable materials. Plastic racks can be autoclaved or recycled.

Pipetting should be comfortable. The repetitive action of mounting and ejecting pipet tips and aspirating liquids produces significant strain and puts you at risk for stress injuries to your thumb, hand, and arm. Labcon pipet tips for the Rainin® Lite Touch Tip Ejection Pipetting System (LTS™) bring the higher quality, reduced environmental impact, and powerful performance of Labcon-manufactured tips to ergonomic pipetting. Designed to mount and eject with less force than twisting the cap on a water bottle, Labcon pipet tips for LTS™ pipettors seal easily and consistently to reduce the physical impact of lab work.

The Labcon quality control team tests every lot of pipet tips for fit, function, reproducibility, accuracy, liquid retention, contamination, clarity, ease-of-ejection, and smooth-open orifices to ensure that our pipet tips meet the stated specifications in your experiments. Laboratory testing confirms all pipet tips are free of biological contamination to ensure dependable results and repeatability in your assays. Labcon pipet tips are made of high-quality, non-cytotoxic, medical-grade resin, and are offered in different formats for your specific experiments, including low retention tips for viscous and low concentration samples, and aerosol filter tips to block cross contamination of sensitive experiments. Tips are manufactured, packaged, and sterilized in the United States, with many tip offerings achieving ACT score status for reduced environmental impact. Labcon is a US FDA registered medical device facility and offers sterile products validated for medical, clinical and research use.

- **Pipet tips are certified free of:**

RNase/DNase, ATP, endotoxin/pyrogens (<0.05EU/mL), cytotoxic effects, and trace heavy metals (<1ppm).

- **Aerosol filter tips are additionally:**

Certified free of Protease and human DNA. Suitable for DNA manipulation, PCR, and radionuclides.

- **Sterile pipet tips are validated ISO 11137 for research, clinical and diagnostic use**

Certified sterile with a 10⁻⁶ sterility assurance level (SAL).

- **Quality certification and ACT scores available**

Certificates outlining functional and biological testing are available for each lot number. Specific products include an ACT environmental impact score.

- **100% medical-grade polypropylene resins**

USP class medical-grade resins and packaging. Non-cytotoxic, 100% radiation-stabilized, virgin polypropylene resins are free of DiHEMDA, oleamide, and BPA.

- **Autoclavable tips and racks**

Refillable racks can be used multiple times.
