The Living Urn is Australia’s leading fully sustainable Bio Urn & Planting System—using innovative technology to turn cremated remains into a beautiful and enduring plant.
What Is The Living Urn?

WE'VE SPENT YEARS WORKING WITH LEADING SOIL SCIENTISTS AND ARBORISTS TO DEVELOP THE MOST ADVANCED BIO URN AND PLANTING SYSTEM ON THE MARKET TODAY.

Cremated remains are simply placed in the biodegradable Urn, along with our custom soil and carefully selected seedlings. Customers can then plant a memorial tree in a location of their choosing. An enduring memorial tree will then grow from the urn and the cremated remains, allowing families to create a beautiful living memory, and give back to nature.

How It Works

1. Cremated remains are placed in the Living Urn system, along with our ash neutralising soil, wood chips, and selected seedlings.

2. Plant the urn & seedlings in any chosen location. We provide premium seedlings and partner with Australia's best nurseries, ensuring successful growth.

3. Grow a beautiful and enduring tree in memory of your loved one. Our urns are 100% eco-friendly and biodegradable.

Why Choose The Living Urn

Every urn comes with a premium seedling, or baby tree, making it easy for people to successfully plant and grow a healthy, enduring tree, whereas seed germination fail rates are high.

Our biodegradable urns are 100% natural and sustainable, made from recycled plant-derived materials using only water, heat and pressure.

Our local customer support team is available 24/7.

What's Included

- The Living Urn Bio Urn
- Our Proprietary Soil / Ash Agent (counters natural properties of cremated remains that can make growing environment hard on a young tree)
- Wood Chips
- Beautiful Handmade Bamboo Planting Urn Case
- Planting Instructions
- Voucher for a young tree of choice (~2 to 4 foot, depending on tree) from our nursery partners
- Up to 5 different tree options for each state so families can rest assured their tree will successfully grow in their specific location.

The Eco Water Urn is the perfect choice for anyone with a love of wide open spaces, who wants to honour their loved one with a water based memorial. Simply place the urn in any body of water, and the urn will float away with the natural tide, letting you craft the perfect ceremony in nature.

Our proprietary design allows you to control the float/dissolve time. 100% natural made from recycled plant materials, with no glues, using only heat and water, the Water Urn is fully biodegradable in water. Elegant handmade bamboo urn case for transport and ceremonies. Perfectly accompanied by a commemoration wreath and flower arrangement.
