DESCRIPTION

ATP2000H micro spectrometer is a low noise high-performance, miniature fiber-optic spectrometer. Its sensor is a 2048 pixel CCD which responds from 200-1100 nm.

ATP2000H is perfect for fast detection attribute to its high A/D converter frequency and the high speed data transmission. In ATP2000H memory chip, some algorithms to improve the performance are programmed solidly, such as wavelength calibration coefficients, linearity coefficients. It output the spectrum data to PC through USB 2.0 or RS232 interface. ATP2000H operates with a single +5VDC supply supplied from USB or duo-pin interface
