ABOUT US

We are a company established in 1999 in Istanbul in order to meet the sectoral needs in the best way and to spread the domestic production. Thanks to the added value we have added to our socks sector since our establishment, we have progressed with each passing day and carried our roots with our quality difference.

We have always been able to provide service with the principle of "local and quality products" and we have always been able to translate our journey from the very first day of production. The production of children's, men's and women's socks is a professional team work that carries the excitement of doing their jobs well and at every stage of production, which makes us always open to dynamic and innovative.

We are a company that has always received positive feedbacks from our customers because we always follow the innovations in our field with our R&D studies and we have a structure that reflects our deficiencies and this keeps us up with technology. We have always been right in our work with our production and customer satisfaction focused and listening to the voice of the sector and our success has been riveted every passing day.

"In short, Socks; first it took the name of the yarn and entered the factory with a timid expression. Later, was touched, ironed, checked, packed and finally arrived at your feed. "

We are happy to offer this service to you ...

BAMBOO

STYLE & FASHION

What's the benefits of **bamboo**?

SOFT

Bamboo has a soft and luxurious feel, almost like cashmere!

SAFE

There are no chemicals in the bamboo fibers and its natural softness makes it gentle to even the most sensitive skin.

ANTIBACTERIAL

The bamboo has natural antibacterial properties, so it keeps your feet clean and prevents unpleasant odors due to bacteria activity.

LESS MOISTURE

Highly absorbent, bamboo can wick the moisture four times as good as cotton socks do, which also minimizes the risk of unpleasant smells.

THERMO CONTROL

The bamboo fibers are thermos-regulating, essentially keeping your feet cool and breathing during the summer, and warm during the winter.

Bamboo is also one of the most **environmentally** friendly materials!

SUSTAINABLE

It's resistant to pests (so no harmful chemicals are used), and because it's a grass, the roots regenerate after the crop has been harvested.

GROWS FAST

It takes the bamboo about 3-4 years to reach fruition after it has been planted, making it the fastest growing plant. It also benefits the soil in which it grows.

GROWS NATURALLY

Bamboo growth isn't taxing on the environment: with the right conditions, it grows fast and strong without any fertilizers, pesticides or irrigation system.

PRODUCES OXYGEN

Apart from being kind to the environment, bamboo also produces 30% more oxygen than a hardwood forest of an equal size.
