**Tortuga Expands Award-Winning Outbreaker Collection With Versatile New Design:  
Outbreaker Laptop Backpack**

*The versatile secondary bag optimized for air travel*

Walnut, CA (February 25, 2020) -- Tortuga -- creators of carry on travel backpacks, daypacks, and accessories for city travelers -- announces the launch of the Outbreaker Laptop Backpack: a travel-optimized backpack that fits under the seat of an airplane.

“Most travelers use a two-bag system -- often a duffel, rolling suitcase, or carry on-sized travel backpack, plus a personal item for under the seat. That personal item is often whatever they had lying around at home and often not optimized for air travel,” commented Tortuga co-founder, Fred Perrotta. “The Outbreaker Laptop Backpack is specifically designed for air travel and makes it easy for travelers to have access to everything they need at their seat. Plus, it doubles as an organized daily carry once they arrive at their destination.”

The Outbreaker Laptop Backpack is the ideal under-the-seat backpack for a frequent traveler. It features a front panel opening for easy packing, a TSA-friendly lay-flat electronics compartment, plenty of pockets, premium weather resistance, and a luggage pass through sleeve to pair seamlessly with a rolling suitcase. Once explorers reach their destination, it is the perfect backpack to explore a new city with or carry to a café to work remotely.

The Outbreaker Collection, for experienced travelers who demand high performance, features obsessive organization, best-in-class ergonomics, highly durable materials, and premium weather resistance.

## **About Tortuga**

On a backpacking trip to Europe in 2009, Tortuga co-founders Fred Perrotta and Jeremy Michael Cohen learned that most luggage is ill-suited for city travel. They couldn't find the perfect luggage for city travel, so they made it. Today, Tortuga is a 100% remote team on a mission to make travel easier and more enjoyable.
