**Tortuga Expands Award-Winning Setout Collection With Versatile New Designs:  
Setout Laptop Backpack and Setout Duffle Bag**

*The two-bag system for carry on travel*

Walnut, CA (November 5, 2018) – Tortuga – creators of carry on travel backpacks, daypacks, and accessories for city travelers– announces the launch of their two newest designs, the Setout Laptop Backpack and Setout Duffle Bag. Together, the Setout Duo Bundle is an ideal travel-optimized set for air travelers.

“Walking through the airport, you see a lot of travelers with the same system: an old gym bag and an outdated school backpack that was sitting in their closet– neither of which are optimized for air travel,” commented Tortuga co-founder, Fred Perrotta. “The Setout Laptop Backpack and Setout Duffle Bag are specifically designed for airplane travel and are an ideal system for two-bag travelers.”

The Setout Laptop Backpack is a versatile secondary bag with considered details for air travelers. It slides under the seat of most airplanes and carries travelers’ electronics, chargers, a change of clothes, and in-flight essentials. It’s the perfect companion to a duffle bag or rolling suitcase. The Setout Laptop Backpack features a front panel opening for easy packing, padded sleeves for a laptop and tablet, and a luggage pass through sleeve to pair with a rolling suitcase for a seamless trip to your gate. Once cultural explorers reach their destination, the Laptop Backpack is the perfect daypack to explore a new city or work from a café.

The Setout Duffle Bag is an ideal carry on for short trips. The Setout Duffle Bag features a spacious main compartment for clothes, but unlike a typical gym bag, it has organizational features including a laptop compartment, an organizational panel for small items such as a

passport, keys, and sunglasses, and a shoe compartment to keep dirty soles away from clean clothes. The Duffle Bag also has a luggage pass through sleeve to be paired with a rolling suitcase for longer trips.

### **About Tortuga**

On a backpacking trip to Europe in 2009, Tortuga co-founders Fred Perrotta and Jeremy Michael Cohen learned that most luggage is ill-suited for city travel. They couldn't find the perfect luggage for city travel, so they made it. Today, Tortuga is a 100% remote team on a mission to make travel easier and more enjoyable.
