

# The SPM Difference

## SPM technology. Defined by Metagenics. Perfected by science.

Great moments in history are defined by the people who create them. Metagenics, in collaboration with world-renowned experts, set the standard for defining specialized pro-resolving mediators (SPMs) based on activity for use in nutritional formulas and became the first to deliver an SPM product in North America. Today, SPM Active plays an integral role in demonstrating how technology can be used by healthcare practitioners to provide world-class nutritional solutions for their patients. Discover how Metagenics continues to define and deliver this revolutionary technology.

### Our vision

Metagenics is dedicated to bringing you innovative, groundbreaking products to ensure you stay on the leading edge of science and progress toward the mission of personalized nutritional intervention as the standard of care for your patients.

## The Process

### SPM technology development

From the first drop of fish oil to fractionation and creation of the finished product, Metagenics follows a stringent, patent-pending process to create SPM Active.

## The History

### Legacy timeline

Metagenics knows SPMs. We are the first to market and deliver an SPM product in North America for clinical use and continue this legacy with SPM Active New & Improved.

## The Science

### The research behind SPMs

Metagenics partners with world-class researchers and institutions to bring you the best-in-class nutritional solutions in evidence-based medicine.

#### Practice-Based Clinical Evaluation

Multisite observational studies conducted to determine potential applications of SPM Active in clinical practice

#### Academic Research Collaborations

Human clinical trials to explore the impact of supplementation with SPM Active on lipid mediator profile and hallmarks of resolution response

#### Education

**MetagenicsInstitute.com**—Extensive educational content developed with leading experts in the field of resolvins biology including: Charles Serhan, PhD; Jesmond Dalli, PhD; Niccolo Terrando, PhD; and Joan Claria, PhD
