The raw material used was collected from Sprague Dawley rats. The material for this product was processed in the USA from the blood of healthy animals that had not been inoculated with or exposed to any infectious agents. During processing this material was subjected to a pH of  $\leq 5$  and/or  $\geq 6.5$  for at least 3 hours. At no time during collection or processing was the material commingled with any other material of animal origin. All lots are tested negative/non-reactive for epizootic hemorrhagic fever virus.

This product is not to be used for direct or indirect exposure or inoculation into laboratory and domestic animals. This product is sold for use in IVD, research, further manufacturing, or technical purposes only, and is not intended for direct use in diagnostic or therapeutic applications.
