

# CLEAN UP

## WATER TREATMENT SOLUTION

### GENERAL INFORMATION

CleanUp is a preventative water sterilizing solution that also adjusts water alkalinity, with the intent of raising pH in a variety of irrigation systems. Consult a hydrology expert or representative for appropriate usage and dosage for your system.

#### Stock Concentrate:

23 grams per gallon (RO) for stock concentrate, select injection rate 5ml - 40ml per gallon to increase alkalinity and achieve desired pH

#### Reservoir/Tank:

0.1 - 0.2 grams per gallon to to increase alkalinity and achieve desired pH. Wait 10 - 15 minutes between each adjustment and add 0.05 grams per gallon for each subsequent addition.

### PRECAUTIONARY STATEMENTS:

Wear protective gloves/protective clothing/eye and face protection. Do not breathe mist or vapor. Wash thoroughly after handling. Avoid release to the environment. Collect spillage.
