

Nitrogen Fixing
Phosphate-Solubilizing
Root Zone Inoculating

TRIOLOGIC ROOT INOCULANT

GENERAL INFORMATION

Triologic is a free-flowing, injection-ready microbial root inoculant, containing *Azobacter vinelandii*, that solubilizes phosphate, populates root zone with beneficial microbes, and makes nitrogen more available to the plant.

DIRECTIONS

- For best results use with non-chlorinated water
- 0.5ML - 1ML per Gallon
- Apply once every 1-2 weeks for entire plant life cycle

INGREDIENTS

Azotobacter vinelandii 1.0%
3.2 million colony forming units/cc (units/ml)
Total Inert Ingredients (water, sucrose)..... 99.0%

TRIOLOGIC ROOT INOCULANT

SOIL AMENDING GUARANTEED ANALYSIS CONTAINS NON-PLANT FOOD INGREDIENTS

VEG & FLOWER CYCLES All-Phase Compatible
No harsh chemicals. 100% safe for plants, animals & root zone.

2.5 Gallons is 20.85 lb at 68°F

*Not for use in organic crop and organic food production in the state of California.

STORAGE CONDITIONS

Store at room temperature out of direct light.
