RING SIZE GUIDE

This guide is designed to help you determine your ring size using an existing ring. For the most accurate results, use a ring that has a similar band width and style to the one you're looking to purchase.

STEP 1

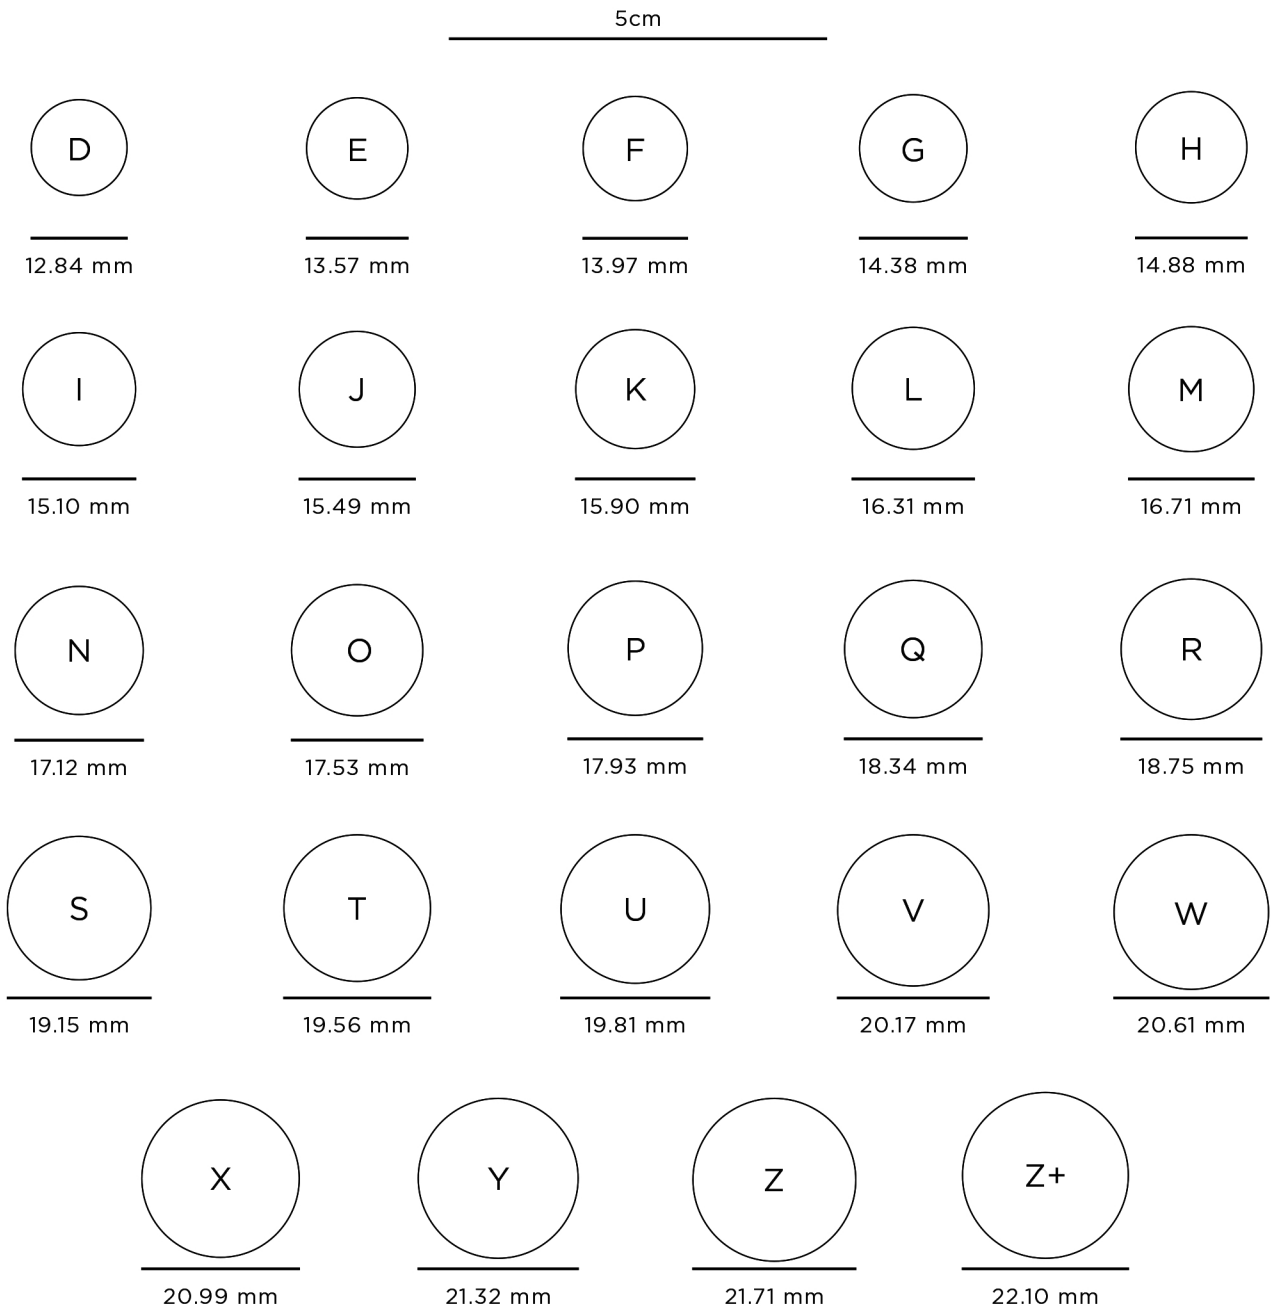

Print this document at full scale with 'none' for page scaling. Confirm accuracy by ensuring the line below measures exactly 5cm.

STEP 2

Position your ring over the chart below, aligning the inner edge with the circle that most closely matches its size.

STEP 3

The letter within the circle that closely matches your ring is your size. If it falls between two sizes, opt for the larger option.
