

Dental Jewelry is bonded to the tooth with a dental adhesive with the same technique as bonding dental brackets. Once the jewel is light cured in place it cannot be moved and can only be removed by a dental professional. Parental consent is required for persons under 15 years of age. Twinkles are made from 22-24k gold and are non-allergic. Swarovski crystals are led free glass crystal with a platinum backing. Brush your teeth as you normally do and smile a lot.

I have read the above information and declare I have no know allergies against the materials used.
