

Small but extra ordinarily elegant!

Twinkles is the new thing to give you a reason to smile.

What you see is a tiny 24k gold gem in shape of a heart or a star. It is called Twinkles dental jewelry and is designed to be bonded to the surface of the tooth.

With a 5 min procedure similar to bonding braces, your dentist will enhance your smile for years to come. Twinkles is non-invasive, painless and can be polished of without leaving a trace.

Placed on your canine this gem definitely will be the conversation piece of any person you decide to flash your smile at.

The full collection of Twinkles can be seen at www.twinkles.net. All our products are 22k , 24k gold or 18k white gold. Some models set with 0,01 ct brilliant cut diamonds.

As a discreet yet reversible variation of body art, Twinkles is a fashion welcomed by trendsetters as well as dentists.

This fashion was first introduced in Europe by the Swedish company Twindent, and now celebrate 17 years of supplying Twinkles tooth gems to dentists worldwide.

Twinkles is delivered with easy instructions to the dentist. All materials used for the procedure is already available at your dentist as it is tested products used daily in clinic environment.
