- \* *Maximum static weight the desk can support is 50LBS.*
- \* *If mounting into concrete or sheet metal studs, consult your local hardware store.*

# INSTRUCTIONS

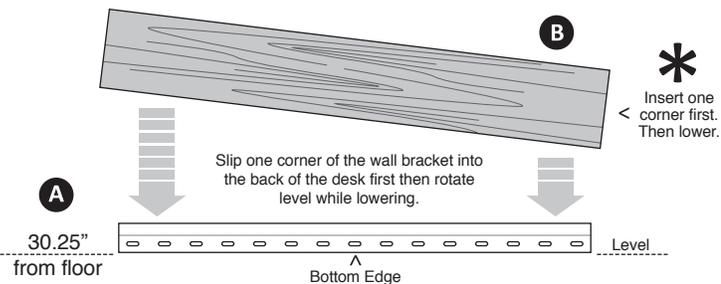

## STEP 01

- A** Use a stud finder to locate a minimum of 2 studs which are mandatory. If you can secure into 3 studs that is even better. Mark the center of each stud.
- B** For sitting height measure 30.25" from the floor. Use a level.
- C** To determine your ideal standing height, stack books on a nearby table to desired height. Once you find your sweet spot, make note of height from the floor to the top of the book. Add 1.25". This will be the distance from the floor to the bottom edge of the wall bracket.

## STEP 02

- A** Align the wall brackets bottom edge with the line marker on the wall. Use a level to confirm bracket is straight. Pre-drill into minimum of 2 studs with 1/8" bit then screw in supplied wood screws, securely.
- B** Lift the desk using both hands and lower onto bracket with one corner in the slot first then angle desk down evenly. Tap top of desk firmly to ensure it is fully settled. Desk needs to be in closed position when installing.

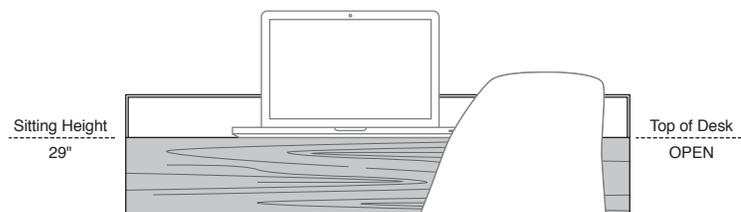

**\* Do not sit on desk!**  
Max Static Weight 50 lbs.

## STEP 03

Now you are ready to enjoy your Minimal Hideaway Wall Desk!

### CARE INSTRUCTIONS

To care for your desk, clean it with a damp cloth. Do not use oil based wood cleaners or harsh chemicals.
