

NVIDIA Jetson AGX Orin 64GB Developer Kit

Next-level AI performance for next-gen robotics.

Develop the Next Generation of Autonomous Machines

The NVIDIA® Jetson AGX Orin™ 64GB Developer Kit makes it easy to get started with Jetson Orin. Compact size, lots of connectors, and up to 275 TOPS of AI performance make this developer kit perfect for prototyping advanced AI-powered robots and other autonomous machines.

The developer kit includes a Jetson AGX Orin 64GB module, and can emulate all the Jetson Orin modules. It supports multiple concurrent AI application pipelines with the NVIDIA Ampere GPU architecture, next-generation deep learning and vision accelerators, high-speed IO, and fast memory bandwidth. Now you can develop solutions using your largest and most complex AI models to solve problems such as natural language understanding, 3D perception, and multi-sensor fusion.

NVIDIA Jetson™ AGX Orin 64GB Developer Kit runs the entire Jetson software stack, as well as use-case specific application frameworks, including Isaac™ for robotics, DeepStream for vision AI, and Riva for conversational AI. You can save significant time with NVIDIA Omniverse™ Replicator for synthetic data generation (SDG), and by using NVIDIA TAO toolkit to fine-tune pretrained AI models from the NGC™ catalog.

Jetson ecosystem partners offer additional AI and system software, developer tools, and custom software development. Ecosystem partners also offer cameras and other sensors for Jetson, as well as carrier boards and design services for your product.

Get the computing capability of more than eight Jetson AGX Xavier™ systems in a developer kit that integrates the latest NVIDIA GPU technology with the world's most advanced deep learning software stack. Now, you'll have the flexibility to create the next generation of AI solutions.
