Type E & F Plugs

The Brandstand Difference

Liquid Spill Testing

For enhanced safety, the Cubie Product Line was designed for and successfully passed a spill test conducted by our testing lab. This test involves directly pouring a 1-liter water and salt solution through the 220V / 110V plugs and USB. The units were then tested for dielectric conductivity on the surface of the unit. Additionally, the unit was required to perform to specification after the test was conducted. Products passed this testing without failure.

Qi Wireless Power

Brandstand is a member of the Wireless Power Consortium.

Surge Protection

International Brandstand Cubie products are tested to the EN 61643 Surge Protection Devices Standard.

Tamper Resistant Outlets

Our mission is to manufacture durable, safe and user-friendly products for the hotel guest room. We continually strive to improve our product line for the latest technology and safety standards.

In an effort to exceed current safety standards, CubieBlue, CubieTime, CubieDuo include Tamper Resistant Outlets.
