

Congratulations on your purchase
of the SlingFin Kahiltna Dome

Pole Guide

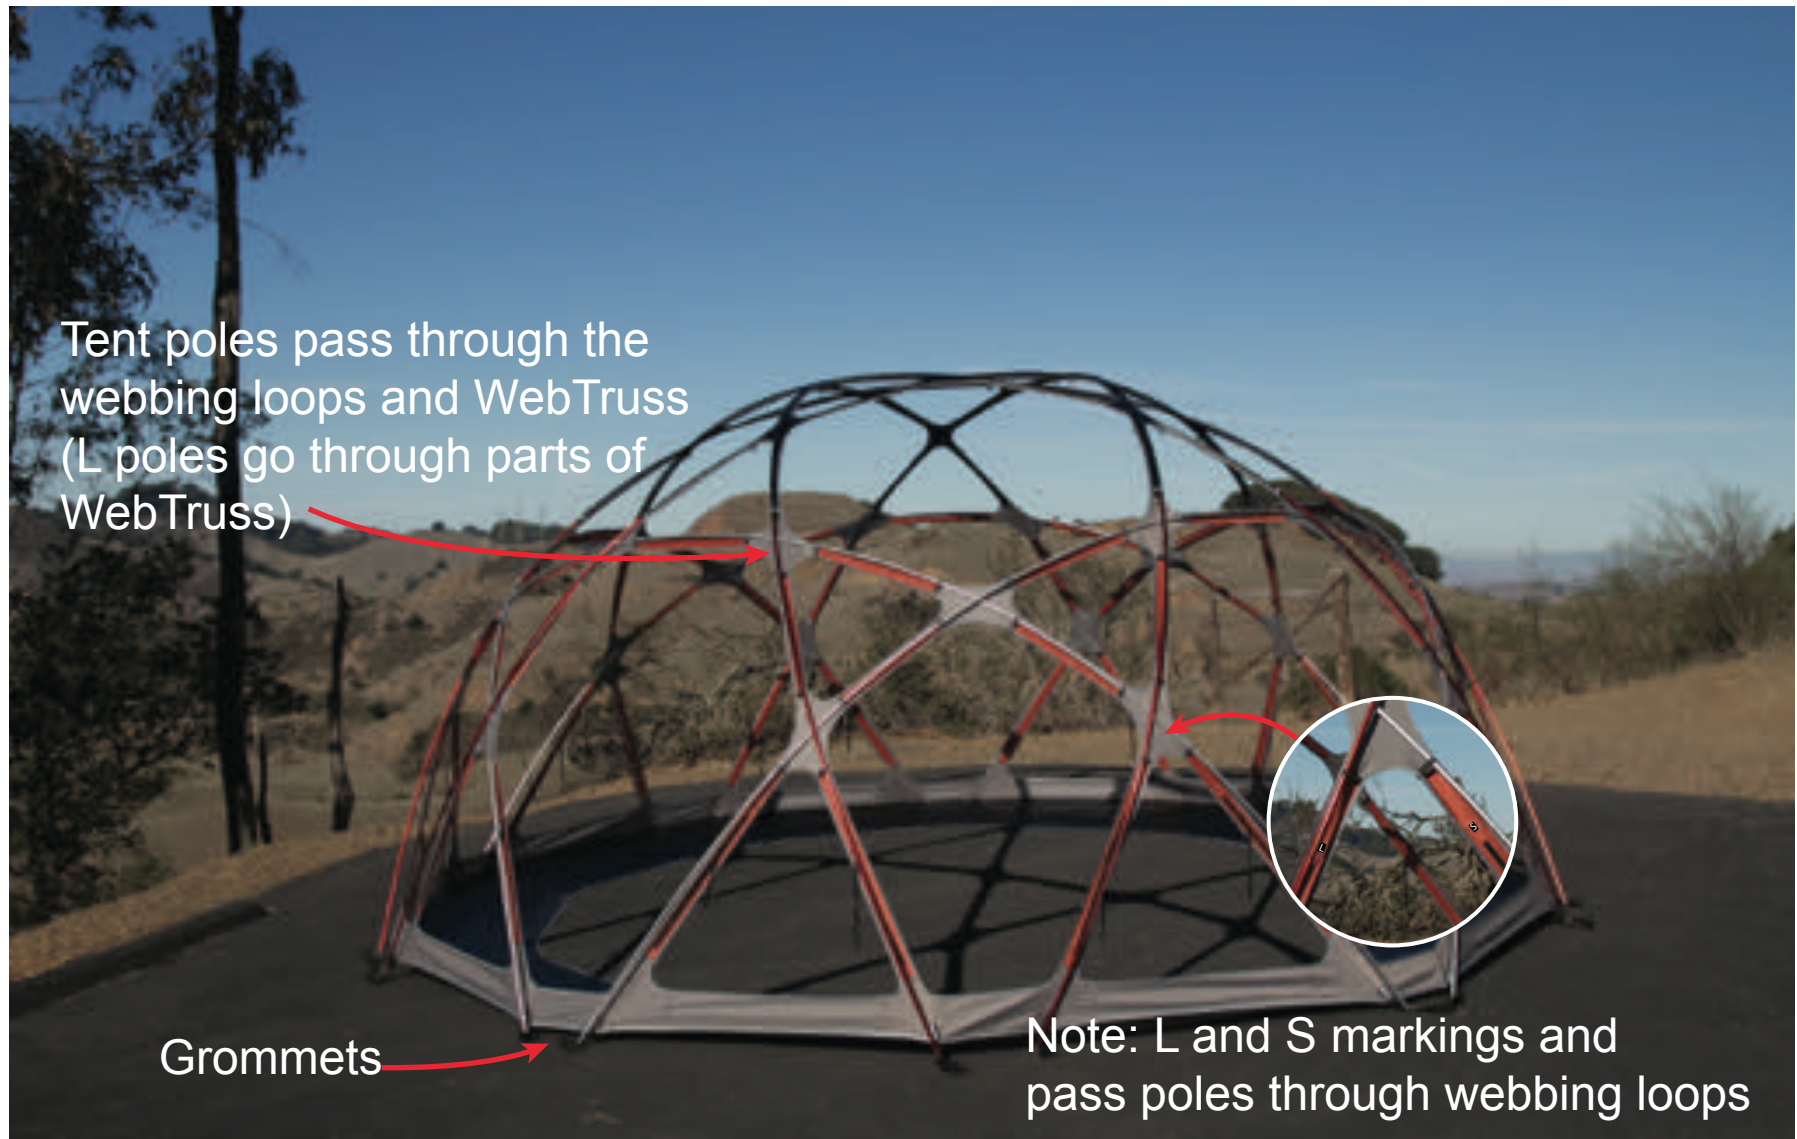

- Long Poles (L)
- Short Poles (S)

KD set up

Extend the tent poles and insert along the WebTruss.
Long poles at locations marked "L" and Short Poles at locations marked "S".

Once the poles are positioned, have someone stand underneath and help “raise up” the tent while the other person inserts the pole tips into the grommets.

Connect tent body to WebTruss (if not attached already). Note that the Kahiltna Dome can be set up with or without the tent body.

WebTruss can be tensioned after setup to increase strength (Note: loosen when taking down tent)

Add on the flysheet. Snowflaps can be extended out or hooked under the tent. Tunnel door can be used as a passageway or to connect to additional Kahiltna Domes.

Snowflaps

Mid-vent

Vent Cap

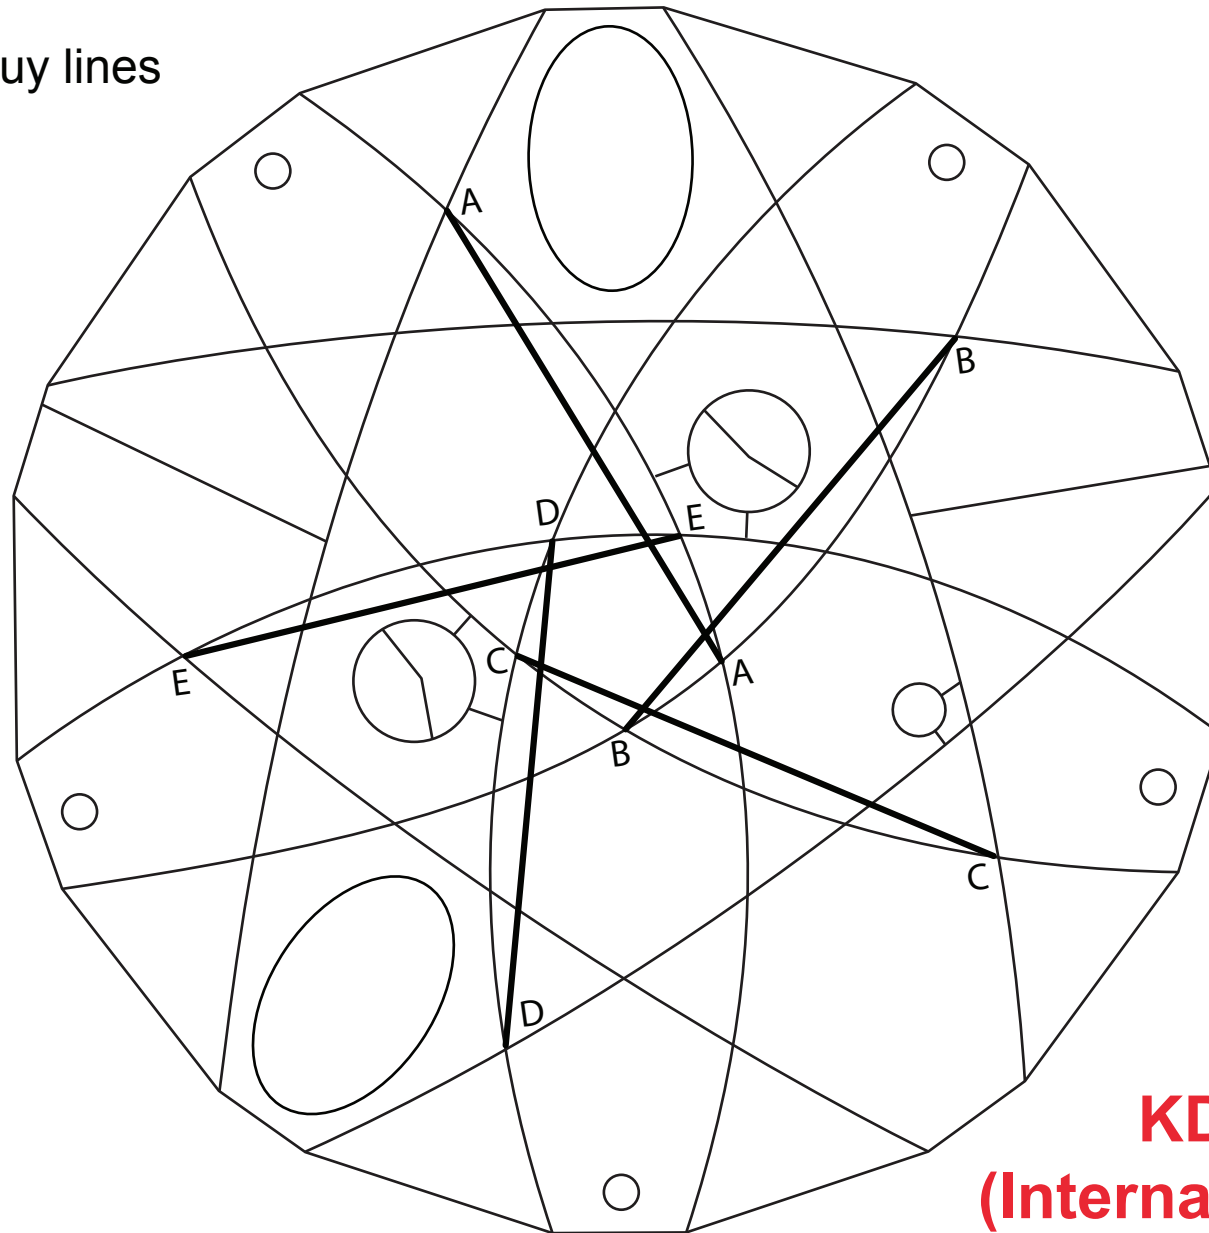

Zippered door

Tunnel Door

If needed, internal guy lines
can be added
(view from interior)

**KD set up
(Internal Guy Lines)**

Attach guy lines AA, BB, CC, DD, and EE to internal rings.
Additional interior guy lines are recommended
as wind speeds or snow loads increase.
