

# TDR2000

## TYRE INFLATOR

### CALIBRATION CERTIFICATE

This Tyre Inflator Part Number: 10.2000 has been calibrated in its normal working position on test equipment with an accuracy that is traceable to International Standards according to: 86/217/EEC

Serial Number:

Date:

ALLOWABLE TOLERANCE		
	±1.2	up to and including 58 p.s.i.
<b>P.S.I.</b>	±2.3	between 58 and 145 p.s.i. inclusive
	±3.6	greater than 145 p.s.i.

TEST RESULTS				
<b>REFERENCE PRESSURE P.S.I.</b>	29.0	58.0	87.0	116.0
<b>DISPLAY PRESSURE P.S.I.</b>				

### Maintenance - Monthly

Remove the 'oil' screw on the side of the gauge and place 2-3 drops of 'light' oil into the gauge mechanism.

### Important

No responsibility is accepted for incorrect use of this product.

## Specifications

<b>Supply Pressure</b>	Maximum 200 p.s.i. (1380kPa) Minimum 100 p.s.i. (690kPa) Clean filtered air recommended
<b>Supply Connection</b>	¼" BSP Thread
<b>Body Construction</b>	Die cast aluminium with steel operating lever and impact absorbing bumpers.
<b>Tyre Pressure Range</b>	0-138 p.s.i. (0-960kPa) standard.
<b>Gauge</b>	Linear with magnifying viewing window. Accuracy to 86/217/EC. Complete with Certificate of Calibration.

## Operation

<b>To Inflate</b>	Place hold-on chuck squarely and firmly onto the valve. Fully depress lever for an appropriate period then release lever to display pressure.
<b>To Deflate</b>	Depress lever half way (until air can be heard escaping) for an appropriate period, fully depress lever momentarily then release to display new pressure.
<b>Safety Precautions</b>	Do not exceed the maximum pressure of the tyre. Observe all safety regulations at point of use. Ensure safe working environment when using compressed air. For tyre fitment and inflation of commercial tyres or split rim-wheels, Jamec Pem TDR 2000 should have a minimum hose length of 1.8m. Return to authorised service agent for repair. For more information contact Sales 1300 555 197.
