

# Tips and Tricks for Placing your text on the Bubble Balloons

- Peel off the transfer tape (the film with the Grid lines) and place it on top of your text.
- Then gently peel your text off so that it sticks to the transfer tape  
\*TIP: get a credit card or a knife to help smooth down the stubborn vinyl! Peel it at a very sharp angle to ensure all the text now is on the transfer tape
- If you have more than one word / line of text... do each line separately!  
\*TIP: cut into your transfer tape around the text, in order for it to bend when you place the words on. The balloon is a very curved surface, which can make it difficult to place the text on without these cut marks!
- Place your text where you see fit, on your **inflated** balloon, peel off the transfer tape... so your text is now on your balloon...  
and you're ready to party!

TIP: Inflate your balloon a day before your event, or on the day of your event, to ensure maximum longevity
