OptiShield™ grey nanoparticle shields have improve visibility and color recognition vs. original green tinted shields

Available Lift-Front face shield allows easy access to fresh air flow when out of the hazard boundary

40 Cal **AirLite™** made with super lightweight 11.5 oz fabric system
Super lightweight 11.5oz fabric system with DRIFIRE® 4.4™ shell over layers of DuPont™ Nomex®

Front closure with high temperature zipper with DuPont™ Nomex® zipper tape and segmented Hook & Loop flap

Enhanced wearer visibility with 3M™ brand yellow & silver segmented reflective tape on arms & legs

Auditory vents for improved hearing and communication

Multiple vents improve air-flow while in the hazard boundary and further reduce fogging

ActiveCool Venting™ underarm system with 5x more air-flow to aid in cooling and 3x more stretch improves mobility

FR Control 2.0™ with a silver antimicrobial finished liner in the Lift-Front hood and jacket collar is soft to the touch, kills germs and controls odor

Elastic waistband & rib knit cuffs to improve mobility, comfort, and flexibility

All fabrics and garments proudly made in the USA

14" high temperature leg zippers with DuPont™ Nomex® tape allows easy donning and doffing over boots
