

"We have been bringing the new Enespro kits to the job sites and showing the differences between the old and new garments, and now I am getting requests daily to replace their current kits with Enespro PPE."

TOM KING, Safety Manager,
Continental Electrical
Construction Company

GAME-CHANGING GEAR

**THIS IS ELECTRICAL PPE YOU ACTUALLY WANT TO USE.
AND WE'RE STILL INNOVATING.**

THE EMERGING LEADER IN ELECTRICAL PPE

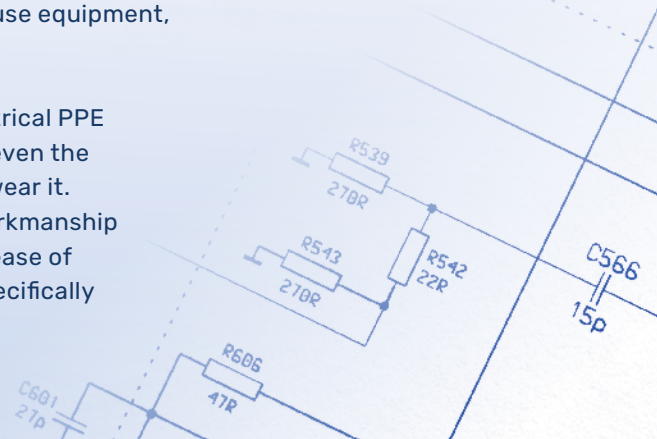

At Enespro, we define leaders as difference makers – unafraid to challenge the status quo, driven to be the first to bring breakthrough innovation that solves real problems. In the world of electrical PPE, Enespro is the only player that fits this definition, with a full line of arc flash protective gear that applies game-changing innovation. Our products are lighter, more comfortable and easier/faster to put on/take off than any other choice in the marketplace.

HERE TO MAKE ELECTRICAL WORKERS SAFER

Enespro was founded to make a difference in electrical safety. It's why we listened – to gain a deep understanding of the issues that help make electrical workers safer – and it's why our equipment challenges the status quo with design and details focused on removing any barriers to use. We have invested in innovation to solve those problems with the industry's lightest, most comfortable, easiest-to-use equipment, from our largest PPE items down to our small gear bags.

Our goal is to help every electrical worker stay safe. That makes electrical PPE performance a given, and our products perform extremely well. But even the most advanced electrical PPE is ineffective if an electrician doesn't wear it. This stark reality shapes our definition of true quality. It's not just workmanship or durability, although ours is the best. It's comfort, fit, mobility and ease of use that are head and shoulders above the competition, designed specifically to drive better job performance, compliance and worker safety.

FEATURES & BENEFITS

Built with comfort in mind, our line of AirLite™ electrical PPE is made in the USA and provides improved fit, flexibility and performance with every stitch.

3M™ SCOTCHLITE™ FR REFLECTIVE TAPE

ACTIVECOOL VENTING™ UNDERARM SYSTEM

ELECTRICAL GLOVE KITS

We offer a complete line of rubber voltage-rated electrical gloves in Class 00, 0 and 2, plus glove kits with leather protectors. All glove kits come in a canvas carry bag.

ELECTRICAL GLOVE KITS

ALL ENESPRO® PPE GLOVE KITS COME WITH:

- Rubber Voltage-Rated Gloves
- Leather Protectors
- Cotton Canvas Bag

RUBBER VOLTAGE-RATED GLOVES

CLASS 00

STANDARDS:

- NFPA 70E® (2021)
- Max Use Voltage
500 V AC/750 V DC
- ANSI/ASTM D120
- Class 00, Type 1

SIZES: 8-12

CLASS 0

STANDARDS:

- NFPA 70E® (2021)
- Max Use Voltage
1,000 V AC/1,500 V DC
- ANSI/ASTM D120
- Class 0, Type 1

SIZES: 8-12

CLASS 2

STANDARDS:

- NFPA 70E® (2021)
- Max Use Voltage
17,000 V AC/25,500 V DC
- ANSI/ASTM D120
- Class 2, Type 1

SIZES: 8-12

ELECTRICAL GEAR BAGS

Enespro's custom gear bags include a padded protective area for shields, a pocket for gloves, built-in grommets for airflow, a waterproof bottom coating and a U-shaped zipper for easy access to gear.

ELECTRICAL GEAR BAGS

Small PPE Gear Bag

Head & hand PPE storage to accompany AR/FR daily wear programs

Large PPE Gear Bag

Exterior storage pockets for easy access

Padded box area to protect face shields and separate compartments for easy storage
