

The only "Glue-on" Shoe with a Built-in Shock Absorber

Available from VICTORY®

The only horseshoe to combine a forged aluminum shoe with a urethane shock-absorbing rim pad and the strongest, safest attachment system. A fast, reliable, proven way to shoe sore-footed horses or those with compromised hooves.

ELITE Flat

Lightweight, wide web, forged aluminum, front pattern. Flat heels can be drilled and tapped for studs.

In seven sizes: 00 thru 3

ELITE 2° Wedge

Provides firm heel support in corrective shoeing for all running and performance horses. Lightweight, wide web, forged aluminum, front pattern. Flat heels can be drilled and tapped for studs.

In six sizes: 00 thru 2

ELITE Hind

Lightweight, wide web, forged aluminum. Flat heels can be drilled and tapped for studs.

In three Sizes: 0, 1, 2

QUEENS PLATE

Used where raised toe calk inserts are prohibited. Steel insert is flush.

In five sizes: 4, 5, 6, 7, 8

TREADMILL CAPABLE

Queens Plate flush toe for treadmill applications. Built with a special urethane rim-pad (color coded). Designed and proven to deliver reliable shoe performance for artificially high impact and high temperature issues in treadmill use.

Also suitable for track work. Lightweight, forged aluminum, front pattern.

In three sizes: 5, 6, 7

XLT

Used where raised toe calk inserts are prohibited. 0.080" raised toe steel insert.

In five sizes: 4, 5, 6, 7, 8

OUTER RIMS

Front plate with toe calk and outside rim level. Permits horse to stand level.

In six sizes: 4, 5, 6, 7, 8, 9

MORRISON ROLLER MOTION

Dr. Scott Morrison's Design...Clinically-designed, tested, and proven! Series I "glue-on" configuration only. Wedged urethane rim pad, machined aluminum.

In seven sizes: 4 thru 10 (equivalent to 00 - 3)

MORRISON THIN PLATE

Dr. Scott Morrison's Design... Traditional nail-on shoes (unpunched)— not a Series I "glue-on." Morrison ground surface design with the progressive roll at the toe. This shoe is not wedged as is the regular Morrison Roller Motion Shoe. Machined from aluminum alloy plate.

In seven sizes: 4 thru 10 (equivalent to 00 - 3)

MC (MORRISON CLUB) COMPOSITE

Dr. Scott Morrison's Design... "Morrison Club" A shoe designed with a rolled toe for foals, young horses, and ponies. Useful for treating club foot in foals. This shoe is not wedged, but can be rasped or ground. Solid urethane for maximum shock-

reduction and wear. Built with a metal insert for shaping and to allow drill/tap for attachments. Series I "glue-on" configuration only.

In five sizes: 00, 0, 1, 2, 3 (race sizing)

SoundHorse Available from VICTORY®

SERIES II MODULAR SHOE SYSTEM

Reliably create any size or shape of therapeutic shoe utilizing an aluminum plate (8 x12 x 3/16) (see profiles) and a hand-held sabre saw. Fabric cuffs are securely bonded to the customized plate by heat and pressure.

SERIES III UNIVERSAL "GLUE-ON" CUFF

Reliably glue on any shoe, any shape, any size, or any material (steel or aluminum).

Available In five sizes: 000, 0, 1, 2, 5
Can be used to make any shoe pattern. Cut with a jigsaw.

MEDIAL/LATERAL EXTENSIONS

Two options to aid in the treatment of conformation issues in foals and yearlings. Both the urethane and aluminum extensions offer correction with a balanced hoof capsule that is more symmetrically loaded.

STRINGTOWN FORGE™

An ALUMINUM Extension

These direct glue shoes have been used extensively since 1999 in the central Kentucky area on Thoroughbred foals and yearlings.
7 Sizes Available

POLYMER FORGE™

A URETHANE Extension

Thin, flexible urethane encourages natural growth patterns and helps "correct" angular limb deformities in foals and yearlings.
The narrow side heel of the urethane extension has been left full to cover a

wide range of foot shapes. If necessary it can be easily removed with a grinder before application or with a rasp after applied.
7 Sizes Available

COLORED PIGMENTS

Intense pigments that are chemically compatible with all acrylic adhesives. Each syringe can color 4-5 pairs of "Glue-on" shoes.
5 Colors Available.

Finished shoe

HOOF CRACK SUTURE KIT

A single packet containing:

- 8 Stainless Sutures with SS Backing Plates (pre-threaded with three inch wire legs)
- 8 Stainless Steel Backing Plates (additional plates on a loop in the bag)
