Hoof Conditioners

TOPCOAT Hoof Conditioner Item 113, 13.5 oz (400mL)

TOPCOAT is a dual-action hoof conditioner that provides total hoof care! It Shines, protects, and rebuilds hoof with collagen protein emulsions. TOPCOAT disinfects against bacteria and fungi as it promotes a healthy moisture balance in the horn, sole & frog for maximum flexibility. The protein coating dries to a hard finish in minutes which helps to repel external moisture & contaminates. Apply 2 times weekly.

SAV-A-HOOF PROTECTANT Item 309, 7.5 fl. oz.(222 mL)

The PROTECTANT is the first “dual-action” hoof conditioner that provides an effective barrier against infection as it repels external moisture and contaminates. Improves hoof flexibility and frog function by maintaining the natural moisture balance within the hoof. Cures to a battle hardened finish that outlasts hoof oils, salves and hoof dressings. Works in both wet or dry conditions. Protects hoof wall, sole & frog.

Hoof Repair Products

SBS Crack Filler Kit II Item 203, (one) 2 oz 50 mL cartridge, mesh

The kit includes a convenient two part dispensing tube that allows you to use only what you need with no waste. Approximately 1 to 8 repairs per kit. The kit has excellent adhesive qualities and is impervious to urine, water, and contaminates. Becomes a part of the hoof wall in 20 minutes. Grows out with hoof. Rasps easily.

SBS HOOF PATCH Kit II Item 204, (one) 2 oz 50mL cartridge, 2 patches

The kit contains two heat moldable resin patches and a two part space age adhesive. Hoof Patch stabilizes quarter cracks in minutes without screws and does not have to be removed. The patches are easily rasped as the crack grows out. It's easy! Heat mold it. Glue it. Rasp it. Cures in 20 minutes.

TOE GROW Spray or GEL Item 416, 16 fl. oz. Spray; Item 411, 10 oz. GEL

The product is a copper-peptide complex that works by attaching to the receptors on cells to switch them on to build and heal damaged tissue. Toe Grow enhances blood flow and collagen production to the feet, which helps to repair cell damage. Apply along the coronary band, on bruised heels, hoof cracks, and damaged clefts and frog. Promotes faster healing and growth. Increases capillary circulation. Available in a handy Spray or Gel formula.

STARTING GATE NUTRITIONAL GRANULES

The granules help prevent and cure gastric equine ulcers naturally by strengthening the epithelial tissue that line the of the gastro intestinal tract. This is where most ulcers occur. The 1.1 gallon “travel size” is a 3 week supply, and the 5 gallon size is a 15 week supply. Starting Gate is a natural product which can also be used safely in conjunction with acid blockers and to wean-off drugs that are prescribed temporarily to relieve painful burning ulcer symptoms. Starting Gate enhances nutritional absorption which has shown to improve hoof growth.

Item 404, 4.125 lbs (1.1 gallon): Item 406, 18.75 lbs (five gallons)

Fight Hoof Disease

THRUSH STOP (liquid) Item 004, 4 fl. oz.(118 mL); Item 008, 8 fl. oz. (236mL)

Thrush Stop was named “Product of the Year in 2009” in *The Horse-Journal*. They said it worked on the most chronic cases of thrush that nothing else could touch, yet was long lasting and gentle to hoof tissue.

THRUSH STOP BLUE (gel) Item 002, 2 oz. 60g; Item 006, 4 oz. 118mL

The blue color marker stains diseased hoof tissue and shows where to add more as the color fades. Gel is formulated to fight stubborn bacteria & fungi along white line, clefts of the frog, cracks and nail holes. There is no run off or waste with the gel. Uses flexible tip!

SAV-A-HOOF GEL Item 301, 1 oz (118mL)

The unique time release gel formula fights white line disease, seedy toe, thrush, candida yeast, aerobic and anaerobic bacteria, mold and fungus. Lasts for weeks. Use it in nail holes, cracks, and defects. Apply along horn rim, deep into sulcus, under shoes and pads.

SAV-A-HOOF LIQUID Item 307, 7.5 fl. oz. (222 mL)

The liquid fights white line disease, seedy toe, thrush, candida yeast, anaerobic and aerobic bacteria, mold and fungus. Apply daily for best results. Can also be applied to the coronal band which will allow it to enter the horn tubules. Handy dauber applicator included.

SAV-A-HOOF Med-i-sole (gel) Item 310, 10 oz (296mL)

Med-i-sole fights infections of the sole and frog (white line disease, thrush, seedy toe). The special gel formula sticks to the sole and frog, bruised heels, under shoes and pads. Wool, leather, and synthetic pads can be pre-treated with Med-i-sole. Make your own hoof packing by saturating open-cell urethane foam scraps with Med-i-sole.

SAV-A-HOOF SPRAY or REFILL Item 316, 16 fl.oz. (473mL); Item 318, 32 oz quart REFILL

It is a convenient, easy to apply spray formula that fights white line disease, seedy toe, thrush, stubborn candida yeast, fungus, mold, anaerobic and aerobic bacteria. Can be used for prevention as well as treatment. Binds to hoof protein and forms an antiseptic barrier against infection. Safe for the horse, humans, and the environment. Also available in economical 32 oz quart refills.

SAV-A-HOOF Multi-Purpose REFILL Item 320, 128 fl.oz. (1 gallon)

VALUE SIZE! The extra-strength multi-purpose formula is similar in concentration to Sav-A-Hoof Liquid. Fights white line disease, thrush, seedy toe, candida yeast, mold, bacteria and abscesses without harming surrounding healthy hoof tissue. Versatile formula works with sprayers, plastic syringes, daubers/brushes, squeeze bottles, soaking boots or cotton balls. Great for horse farms, ranches, farriers, trainers, horse handlers, or horses owners.
