

LASER ENGRAVING SHEET

STEP 1: *Print this sheet on an A4 white piece of paper.*

STEP 2: *Use the below box to write or draw or have your child create their image for laser engraving. Only use a black sharpie or thick black texta. No fine lines, pens or pencils. No Colour. Black only. Design must not touch the below black outline.*

Remember the final result will be quite small, so to ensure legibility, our best tips is to keep your text or drawing very simple, very clean and minimal and don't write small. This will give you the best result!

STEP 3: *To supply your artwork, either scan this sheet at high resolution 300dpi, or place the sheet on a flat light coloured surface and take a top down photo of the full sheet. Ensure to avoid shadows in your photo.*

ORDER NAME: _____ ORDER NUMBER: #BL _____

ORNAMENT SHAPE: _____
