## CALL FOR INSPECTION FOR THE PETZL ASTRO AND CANYON GUIDE HARNESSSES

Request for inspection of ASTRO and CANYON GUIDE harnesses following the detection of a defect on the gated opening attachment point of an ASTRO harness. Due to the risk of unintentional opening of this attachment point, which could result in a life-threatening situation, we ask you to stop any use of these harnesses and to carry out immediately the following inspection.

ASTRO BOD FAST

ASTRO SIT FAST

<p><b>CANYON GUIDE</b></p>		<p>C086BA00 C086BA01</p>	<p>All serial numbers up to <b>23J 000000 000</b> included</p>

## Origin and consequences of the defect

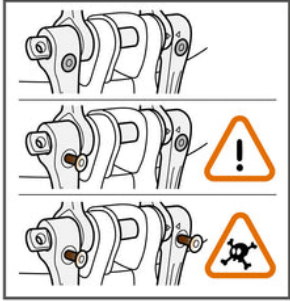

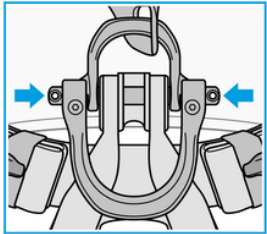

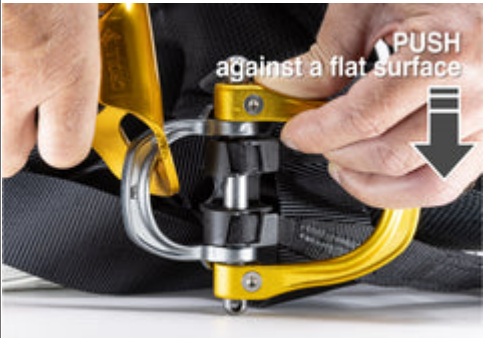

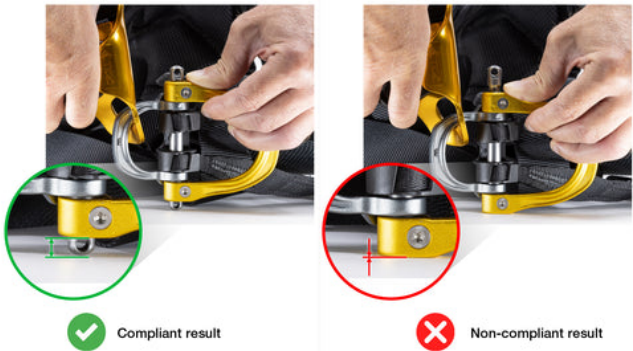

Components of the gated ventral attachment point:

The defect is due to a poor machining process of the metal D. This can cause the pin to slide completely sideways, despite the presence of the 2 screws. This situation presents a risk of death due to strangulation or falling from a height.

# Inspection and Test Procedure

ASTRO BOD FAST & ASTRO SIT FAST	CANYON GUIDE
<p><b>1) Prepare for the test:</b></p> <p>In accordance with the instructions for use, check that the 2 screws are present and correctly installed.</p>  <p>Remove any accessories mounted in the shackle connection holes.</p> 	<p><b>1) Prepare for the test:</b></p> <p>In accordance with the instructions for use, check that the 2 screws are present and correctly installed.</p>

#### C) If you have any doubts about how to perform the test

Please [contact your local support service team using this page](#).

## Safety Alert FAQ's

**Where can I find the serial number of my harness?**

The serial number is located on the plastic label inside the belt.

**Does this apply to all colours of metal D?**

Yes.

**Do I have to dismantle my gated ventral attachment point to perform this inspection?**

No.

**I have a lanyard installed on my harness. Do I have to remove it?**

No.

**Do I need to check that the screws are tightened to the correct torque?**

No, for this inspection, torque has no impact.

**I've never used my harness, do I need to inspect it?**

Yes.

**I'm already using my harness, do I need to inspect it?**

Yes.

**Is it necessary to apply high pressure on the pin to detect this defect?**

No, just a little pressure is necessary.

**During the test, the pin does not slide but I notice a slight play, is this normal?**

Yes, this is a normal functional play.

**Have there been any injuries with the products affected by this information?**

To date, no injuries have been reported.
