

## kül grilles - Slide damper (optional)

To maintain a minimalist appearance, kül offers a visually clean, easily accessible residential slide damper as an accessory to our linear grilles to allow for air flow control where necessary.

Available for our standard 10x3, 10x4 and 12x4 grille sizes, these dampers are stock items and are available for quick ship.

- Quality coated steel construction
- Powder coated black regardless of grille finish
- Ordered separately to be easily snapped onto the grille on-site - no screws or mounting hardware required

- Operator sits 1/8" above the core bars for easy accessibility

*\*Please note: Dampers will further restrict air flow so we do recommend ordering grilles with dampers only where absolutely necessary.*
