## kul plates Installation Troubleshooting

---

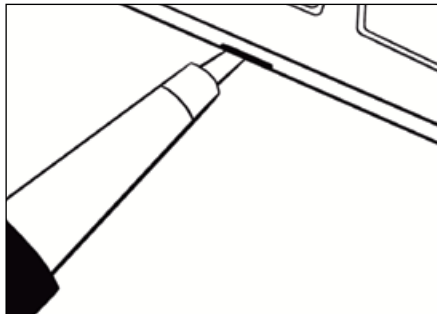

If the plate does not sit flat, this may be because the wall is not flat. Plates can be formed to meet with wall imperfections. Just bend it a little at a time until the desired fit is achieved.

## Removal of kul plates

---

There is a slot on the bottom which can be used to grip the kul plate. You can use a screw driver or even your finger nail.

## Warranty

---

kul plate offers a one year warranty that covers replacement parts due to any defect in material.

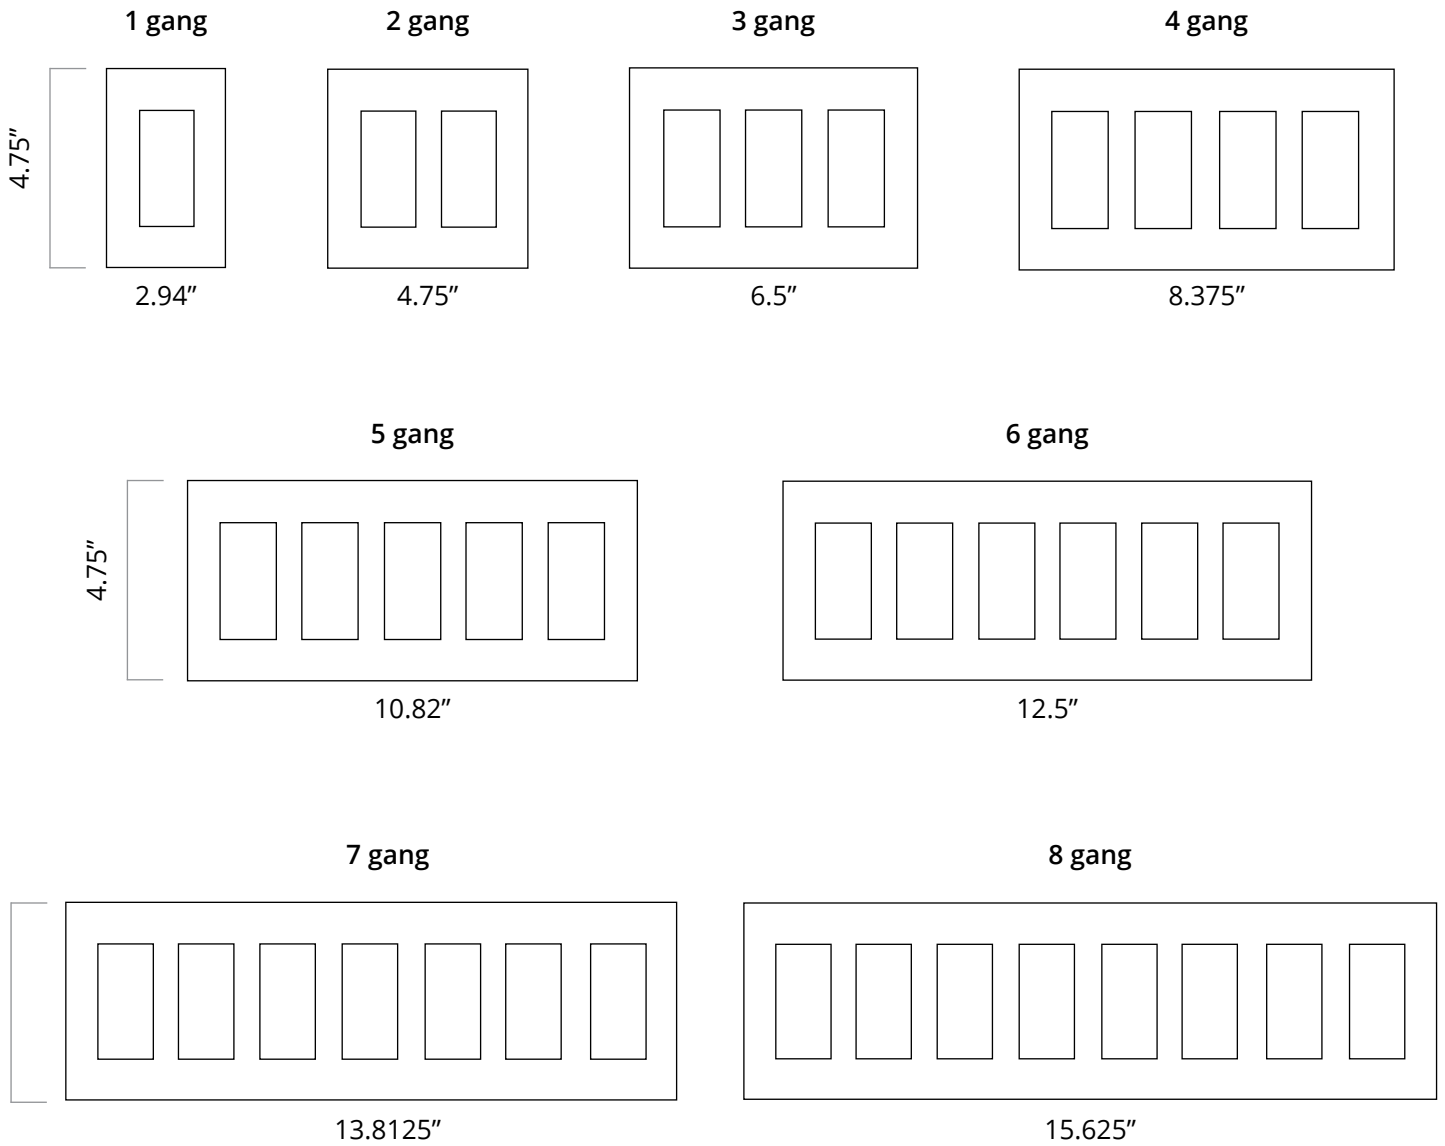

Please contact us if you have any issues and send photos to [support@kulgrilles.com](mailto:support@kulgrilles.com)
